

CONTENTS

Vol. 21, No. 3

September 1977

	Page
Every planar map is four colorable Part I: Discharging By K. APPEL and W. HAKEN	429
Every planar map is four colorable Part II: Reducibility By K. APPEL, W. HAKEN and J. KOCH	491
Subgroups with trivial maximal intersection By STEVEN BAUMAN	568
Finite groups having an involution centralizer with a 2-component of dihedral type, I By MORTON E. HARRIS and RONALD SOLOMON	575
Finite groups having an involution centralizer with a 2-component of dihedral type, II By MORTON E. HARRIS	621
Some countability conditions in a commutative ring By JIMMY T. ARNOLD, ROBERT GILMER and WILLIAM HEINZER	648
Linear algebraic groups in infinite dimensions By L. A. HARRIS and W. KAUP	666
A stable range for homology localization By E. DROR and W. G. DWYER	675
Ordering on a semisimple lie group and character values By LAURENT CLOZEL	685
Incompressibility and fibrations By JAY E. GOLDFEATHER	688
On Chen's iterated integrals By V. K. A. M. GUGENHEIM	703
Complete spaces and triquotient maps By E. MICHAEL	716
Microfiche supplement to "Every planar map is four colorable. Part I and Part II"	

Published by the University of Illinois Press in March, June, September, and December. Supported in part by the George A. Miller Endowment.

The subscription price is \$30.00 a volume (four numbers). The price of single number is \$10.00. Subscriptions should be sent to the University of Illinois Press, Urbana, Illinois 61801. All foreign subscriptions must be accompanied by payment.
