CALL FOR PAPERS

THE ANNALS OF APPLIED PROBABILITY

Volume 1, Number 1, February 1991

The Institute of Mathematical Statistics will publish the first issue of its new journal, *The Annals of Applied Probability*, in February 1991.

In addition to welcoming papers in all the traditional areas of applied probability, the new *Annals* particularly hopes to attract work that develops and deepens the interplay of probability and other fields, including computer science, finance, network modeling, and biology.

Submissions are now being considered for publication and should be directed to:

J. Michael Steele, *Editor*
Department of Statistics
The Wharton School
3010 Steinberg Hall-Dietrich Hall
The University of Pennsylvania
Philadelphia PA 19104-6302 (USA)

Four copies should be submitted and authors are requested to follow the instructions which appear at the front of each issue of *The Annals of Probability* or *The Annals of Statistics*.

*NSF-CBMS Regional Conference Series
in Probability and Statistics
Volume 2*

**EMPIRICAL
PROCESSES:
THEORY
AND
APPLICATIONS**

David Pollard
Yale University

Sponsored by the
Conference Board of the Mathematical Sciences
Supported by the
National Science Foundation
Published by the
Institute of Mathematical Statistics
and the
American Statistical Association

These lecture notes result from the NSF-CBMS Regional Conference held at the University of Iowa in July 1988. Topics in abstract empirical process theory are discussed in fourteen sections—including symmetrization and conditioning, chaining, packing and covering in Euclidean spaces, stability, convex hulls, maximal inequalities, uniform laws of large numbers, convergence in distribution and almost sure representation, functional central limit theorems, least absolute deviations estimators for censored regressions, random convex sets, estimation from censored data, and biased sampling.

The Institute of Mathematical Statistics and the American Statistical Association are proud to copublish the *NSF-CBMS Regional Conference Series in Probability and Statistics*. The volumes in this *Series* are based on the NSF-CBMS regional research conferences and join SIAM's *NSF-CBMS Series in Applied Mathematics* and AMS's *NSF-CBMS Series in Mathematics*.

List Price \$20
IMS/ASA/CBMS Member Price \$12

Institutional standing orders to this *Series* provide for advance notification of publication dates for each volume and access to prepublication discounts of 20%. Members of IMS, ASA, and CBMS societies receive a 40% discount. Prepaid orders for individual volumes and requests for standing order enrollment should be sent to:

**Institute of Mathematical Statistics
3401 Investment Boulevard, Suite 7
Hayward, California 94545 (USA)**

**An Introduction to Continuity, Extrema, and Related Topics
for General Gaussian Processes**

by Robert J. Adler

This monograph provides a general and abstract introduction to the theory of sample path properties of Gaussian processes based on concepts such as entropy and majorising measures. A generally accessible introduction to majorising measures, the general theory of continuity, boundedness, and suprema distributions for Gaussian processes is presented.

Contents

Introduction

The basic ideas; The Brownian family of processes; A collection of examples; Exercises

Two Basic Results

Borell's inequality; Slepian's inequality; Applications in Banach spaces; Exercises

Prelude to Continuity

Boundedness and continuity; Zero-one laws and continuity; The Karhunen-Loeve expansion; Exercises

Boundedness and Continuity

Majorising measures; Upper bound proof; Lower bound proof; Entropy; Ultrametricity and majorising measures; Discontinuous processes; Exercises

Suprema Distributions

Introduction; Some easy bounds; Processes with a unique point of maximal variance; General bounds; The Brownian sheet on the unit square; Exercises

Afterthoughts

Two topics that were left out; Directions for research

THE ANNALS OF APPLIED PROBABILITY

Volume 1, Number 1, February 1991

The Institute of Mathematical Statistics will publish the first issue of its new journal, *The Annals of Applied Probability*, in February 1991. In addition to publishing papers in all the traditional areas of applied probability, the new *Annals* will also publish work that develops and deepens the interplay of probability and other fields, including computer science, finance, network modeling, and biology.

The Founding Editor of *The Annals of Applied Probability* is J. Michael Steele of the University of Pennsylvania. He has assembled a distinguished list of Associate Editors: David Aldous, J. Darrell Duffie, Stewart N. Ethier, J. Michael Harrison, Peter Jagers, Ioannis Karatzas, James McKenna, Michael J. Phelan, Sidney I. Resnick, Joel Spencer, Walter Willinger, and Wojbor A. Woyczynski.

Papers Scheduled to Appear in Volume 1

Loud Shot Noise by George L. O'Brien & R. A. Doney

Geometric Bounds for Eigenvalues of Markov Chains by Persi Diaconis & Daniel Stroock

Mean-Variance Hedging in Continuous-Time by Darrell Duffie & Henry R. Richardson

Implicit Renewal Theory and Tails of Solutions of Random Equations by Charles M. Goldie

Steady-State Analysis of RBM in a Rectangle: Numerical Methods and a Queueing Application by J. G. Dai & J. M. Harrison

Queues with Server Vacations and Levy Processes with Secondary Jump Input by Offer Kella & Ward Whitt

On the Properties of a Tree-Structured Server Process by J. Komlos, A. Odlyzko, L. Ozarow, & L. A. Shepp

Phase-Type Distributions and Majorization by Colm Art O'Cinneide

Forcing a Stochastic Process to Stay in or to Leave a Given Region by Mario Lefebvre

Eigenvalue Bounds on Convergence to Stationarity for Nonreversible Markov Chains, with an Application to the Exclusion Process by James Allen Fill

General subscriptions to *The Annals of Probability* automatically include a subscription to *The Annals of Applied Probability* in 1991. New subscriptions to *The Annals of Applied Probability* only are also welcome.

General subscription price	\$60
Individual subscription price	\$50
Individual membership price	\$10

Order prepaid from:

The
Annual Index
to the
Statistical Literature of the World

**CURRENT INDEX TO STATISTICS
APPLICATIONS, METHODS AND THEORY
VOLUME 15 (1989)–NOW AVAILABLE**

- Approximately 9,000 articles from "core" and "related" journals and books indexed for 1989.
- Complete coverage of approximately 80 core journals in statistics, probability, and related fields.
- Statistics articles selected and indexed from many other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:

Volumes 1-16

IMS/ASA Members	\$20
Other individuals	\$40
Other institutions	\$60

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 1-15 are available now at the above prices. Publication of Volume 16 (1990) is expected late in 1991. Orders for Volume 16 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:
