THE ANNALS OF PROBABILITY

VOLUME 2	JUNE 1974	No. 3
Articles		
Renewal theory for functionals of a Markov chain with general state space		
application to trithm Sensitive discount of	tes in Hilbert space and an he law of the iterated loga	ELBS AND T. KURTZ
Sojourn time probl Limit theorems for o	emslirect sums	Lajos Tákacs Tze Leung Lai
Some results about multidimensional branching processes with random environmentsNorman Kaplan		
On Lebesgue-like ex measures	tensions of finitely additive	LESTER E. DUBINS
Short Communications		
Conditional distribution Uniform inequalities Convexity and condition Mixtures of perfect Generalized distribution dered case with a statistics	stochastic processes	PATRICK BILLINGSLEYL. ROGGEJ. PFANZAGLD. RAMACHANDRANGORDON SIMONSNORMAN KAPLAN ESTER SAMUEL-CAHNR. V. ERICKSON
On the approximation	n of stationary measures by godic measures	
A note on the asympto	otic independence of high level endent Gaussian processes	
Limit theorems for t tionary process On the divergence of a	he maximum term of a sta certain random series DPMANS, N. MARTIN, P. K. PA	G. L. O'BRIEN
On almost sure conver	rgence of quadratic Brownian	•
