Contents

1. Introduction	274
1.1. Algebraic submanifolds and maps	274
1.2. A short history of the question	274
1.3. The main result	275
1.4. Conditions in terms of analytic discs in M'	276
1.5. Levi-form conditions	278
1.6. Essential finiteness and holomorphic nondegeneracy	279
1.7. Basic methods	280
1.8. Organization of the paper	281
2. Some background material	282
2.1. Real- and complex-algebraic sets and their dimensions	282
2.2. CR-points of finite type	282
2.3. Segre varieties and their properties	283
2.4. Reflections of subsets in terms of Segre varieties	284
2.5. A finite-type criterion of Baouendi, Ebenfelt and Rothschild	286
2.6. Levi orthogonality and the inner reflection	286
3. Holomorphic and algebraic families	287
3.1. Notation	287
3.2. Definitions of families and their basic properties	287
3.3. Constructions with families and their fibers	291
4. Jets of holomorphic maps and jets of complex submanifolds	292
4.1. Constructions of jets	292
4.2. Jet compositions	292
4.3. The inclusion relation for the jets of complex submanifolds	293
4.4. Operations with jets and families of analytic subsets	295
5. Proof of Theorem 1.1	296
5.1. Reflections of jets of holomorphic maps	296
5.2. Iterated complexifications and jet reflections	300
5.3. The end of the proof	303
