

EXTRAPOLATION AND INTERPOLATION OF QUASI-LINEAR OPERATORS ON MARTINGALES

BY

D. L. BURKHOLDER and R. F. GUNDY

University of Illinois, Urbana, Illinois⁽¹⁾

Rutgers University, New Brunswick, New Jersey, and the Hebrew University of Jerusalem⁽²⁾

Contents

1. Introduction	250
2. Preliminaries	253
Notation	253
Assumptions	255
Preliminary lemmas	256
3. The right-hand side	265
4. The left-hand side	270
5. The operators S and s	275
Some applications of S and s	281
Random walk	281
Haar and Walsh series	284
Local convergence of martingale transforms	285
6. Operators of matrix type	287
7. Application to Brownian motion	296
8. Further remarks and examples	299

⁽¹⁾ The research of the first-named author was supported in part by the Center for Advanced Study of the University of Illinois and by the National Science Foundation under grant GP-8727.

⁽²⁾ The research of the second-named author was supported in part by the Research Council of Rutgers University while the author was in residence at the University of Illinois (summer 1968) and the Hebrew University of Jerusalem (academic year 1968-69) and by the National Science Foundation under grant GP-8056.

Both authors acknowledge the generous hospitality of the Institute of Mathematics, Hebrew University, and the Department of Mathematics, Westfield College, University of London.
