

ON THE THEORY OF GENERAL PARTIAL DIFFERENTIAL OPERATORS

BY
LARS HÖRMANDER

in Lund

CONTENTS

	Page
PREFACE	162
CHAPTER I. Differential operators from an abstract point of view.	
1.0. Introduction	163
1.1. Definitions and results from the abstract theory of operators	164
1.2. The definition of differential operators	167
1.3. Cauchy data and boundary problems	171
CHAPTER II. Minimal differential operators with constant coefficients.	
2.0. Introduction	174
2.1. Notations and formal properties of differential operators with constant coefficients	176
2.2. Estimates by Laplace transforms	177
2.3. The differential operators weaker than a given one	178
2.4. The algebra of energy integrals	180
2.5. Analytical properties of energy integrals	182
2.6. Estimates by energy integrals	183
2.7. Some special cases of Theorem 2.2	185
2.8. The structure of the minimal domain	189
2.9. Some theorems on complete continuity	201
2.10. On some sets of polynomials	207
2.11. Remarks on the case of non-bounded domains	208
CHAPTER III. Maximal differential operators with constant coefficients.	
3.0. Introduction	210
3.1. Comparison of the domains of maximal differential operators	211
3.2. The existence of null solutions	216
3.3. Differential operators of local type	218
3.4. Construction of a fundamental solution of a complete operator of local type	222
3.5. Proof of Theorem 3.3	229
