

ON THE LINEAR AND ANGULAR CLUSTER SETS OF FUNCTIONS MEROMORPHIC IN THE UNIT CIRCLE

BY

E. F. COLLINGWOOD

Table of Contents

	Page
I. Introduction	166
II. A general theorem on cluster sets	170
III. A theorem on the coverage of radial cluster sets	174
IV. A property of the set $I(f)$	175
V. The set $S(f)$	177
VI. Relations between the sets $F(f)$, $I(f)$ and $S(f)$	179
VII. A theorem on the modular function	180
VIII. Behaviour in the set of Plessner points	181
IX. A theorem on isolated essential singularities	183
Postscript	184
References	184

Index of symbols and technical terms

$C_\varrho(f, e^{i\theta})$; $C_{\varrho(\varphi)}(f, e^{i\theta})$; $C_A(f, e^{i\theta})$	§ 1	$\mathcal{M}(\theta)$; $\mathcal{N}(\theta)$	§ 6
$C_A(f, e^{i\theta})$; $C(f, e^{i\theta})$; $\mathbb{C} C_\varrho(f, e^{i\theta})$ etc; de- generate, non-degenerate, total and sub-total cluster sets	2	$C_{\lambda(\theta)}(f)$; $\mathcal{L}(\theta)$	7
$F(f)$; $I(f)$; Fatou point; Fatou arc; Plessner point	3	$W(f)$; Weierstrass point	8
$S(f)$	5	$S_{\varrho(\varphi)}(f)$; $S_{\lambda(\theta)}(f)$	12
		$\mathcal{S}(f, \theta)$	17
		$S_{\Sigma_{\varrho(\varphi_n)}}(f)$	18
		$\mathcal{S}(g)$	19
