

**HOLOMORPHIC APPROXIMATION AND ESTIMATES  
FOR THE  $\bar{\partial}$ -EQUATION ON STRICTLY  
PSEUDOCONVEX NONSMOOTH DOMAINS**

JOAQUIM BRUNA AND JOSEP M. BURGUÉS

**Table of Contents**

1. Introduction.	
1.1. Nonsmooth strictly pseudoconvex sets . . . . .	540
1.2. Statement of results . . . . .	540
1.3. Techniques. Plan of the paper . . . . .	543
1.4. Other notations . . . . .	544
2. Construction and estimates of the kernels.	
2.1. The Henkin-Ramirez formulas with weights . . . . .	545
2.2. Construction of the section and weights . . . . .	546
2.3. Resulting kernels . . . . .	548
2.4. Formulas for derivatives . . . . .	550
2.5. Estimates of the kernels . . . . .	551
3. The nonisotropic regularization.	
3.1. Definition of the nonisotropic regularization . . . . .	555
3.2. Properties in the $C^{m,s}$ -norm . . . . .	557
3.3. Properties in the $L^p$ -norm . . . . .	560
4. Nonisotropic regularization of holomorphic functions.	
4.1. Nonisotropic regularization and holomorphy . . . . .	567
4.2. Nonisotropic Taylor developments of holomorphic functions . . . . .	569
4.3. End of proof of Theorem 4.1 . . . . .	575
4.4. The choice of the averaging function . . . . .	576
5. Holomorphic approximation.	
5.1. Holomorphic approximation in $C^{m,s}$ -norms . . . . .	577
5.2. Holomorphic approximation in $L^p$ -norms . . . . .	580
5.3. Proof of the estimates . . . . .	581
6. Estimates for the $\bar{\partial}$ -equation.	
6.1. $L^p$ -estimates . . . . .	586
6.2. Euclidean Hölder estimates . . . . .	589
6.3. Nonisotropic Hölder estimates . . . . .	592

Received January 14, 1986. Revision received September 30, 1986.

Supported by grant 1593/82 of the "Comisión Asesora de Investigación Científica y Técnica,"
