

VOLUME INDEX

- Atkinson, Kendall E., see Sloan, Ian H.
Berrut, Jean-Paul, *Numerical solution of periodic Fredholm integral equations of the second kind by means of attenuation factors*, 1.
Capobianco, M.R., *Uniform convergence estimates for a collocation method for the Cauchy singular integral equation*, 21.
Cavaterra, Cecilia, *On an inverse problem for a model of linear viscoelastic Kirchhoff plate*, 179.
Chae, Dongho, *Existence and uniqueness for spatially inhomogeneous coagulation-condensation equation with unbounded kernels*, 219.
Chapko, Roman, *Rothe's method for the heat equation and boundary integral equations*, 47.
Dubovskii, Pavel, see Chae, Dongho.
Elliott, D., *The solution in a class of singular functions of Cauchy type bisingular integral equations*, 237.
Grasselli, Maurizio, see Cavaterra, Cecilia.
Grigorieff, R.D., *Galerkin approximation with quadrature for the screen problem in \mathbf{R}^3* , 293.
Kress, Rainer, see Chapko, Roman.
Lifanov, I.K., see Elliott, D.
Litvinchuk, G.S., see Elliott, D.
Liu, James H., *Singular perturbations in a nonlinear viscoelasticity*, 99.
Lizama, Carlos, *A representation formula for strongly continuous resolvent families*, 321.
Lou, Bendong, *Positive solutions of superlinear Hammerstein integral equations in Banach spaces*, 329.
Mülthei, Heinrich N., *Discrete collocation for a first kind Cauchy singular integral equation with weakly singular solution*, 341.
Novick-Cohen, A., *A Stefan/Mullins-Sekerka type problem with memory*, 113.
Okada, Susumu, *On the solution of the generalized airfoil equation*, 71.
Okada, Susumu, *Symm's log kernel integral operators*, 143.
O'Regan, Donal, *A note on solutions in $L^1[0,1]$ to Hammerstein integral equations*, 165.
Pedas, Arvet, *Superconvergence of piecewise polynomial collocations for nonlinear weakly singular integral equations*, 379.
Plato, R., *Resolvent estimates for Abel integral operators and the regularization of associated first kind integral equations*, 253.
Prössdorf, Siegfried, see Okada, Susumu, 71.
Reifenberg, Michèle, see Berrut, Jean-Paul.
Russo, M.G., see Capobianco, M.R.
Schneider, Claus, see Mülthei, Heinrich N.
Sloan, Ian H., *Semi-discrete Galerkin approximations for the single-layer equation on Lipschitz curves*, 279.
Sloan, I.H., see Grigorieff, R.D.
Vainikko, Gennadi, see Pedas, Arvet.
