

# ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 16, Numbers 1–2

January/February 2011

---

<b>Xiangqing Liu, Yisheng Huang, and Jiaquan Liu</b> , Sign-changing solutions for an asymptotically linear Schrödinger equation with deepening potential well .....	1
<b>Martin Meyries</b> , Local well posedness and instability of travelling waves in a chemotaxis model .....	31
<b>Jérôme Vétois</b> , Existence and regularity for critical anisotropic equations with critical directions .....	61
<b>Y. Sugiyama and J.J.L. Velázquez</b> , Self-similar blow up with a continuous range of values of the aggregated mass for a degenerate Keller-Segel system .....	85
<b>Mauro Garavello and Benedetto Piccoli</b> , Entropy-type conditions for Riemann solvers at nodes .....	113
<b>Massimo Grossi, Hiroshi Ohtsuka, and Takashi Suzuki</b> , Asymptotic non-degeneracy of the multiple blow-up solutions to the Gel'fand problem in two space dimensions .....	145
<b>Colette De Coster and Serge Nicaise</b> , Singular behavior of the solution of the Helmholtz equation in weighted $L^p$ -Sobolev spaces .....	165
<b>Marcello D'Abbicco, Sandra Lucente, and Giovanni Taglialatela</b> , Errata to “ $L^p$ - $L^q$ estimates for regularly linear hyperbolic systems” .....	199
