

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 16, Numbers 9-10

September/October 2011

Francesca Gladiali and Massimo Grossi , Existence and multiplicity results for equations with nearly critical growth	801
Toshitaka Nagai , Convergence to self-similar solutions for a parabolic-elliptic system of drift-diffusion type in \mathbb{R}^2	839
Jean-Michel Rakotoson , Regularity of a very weak solution for parabolic equations and applications	867
Giuseppe Maria Coclite, Gisèle Ruiz Goldstein, and Jerome A. Goldstein , Well-posedness of nonlinear parabolic problems with nonlinear Wentzell boundary conditions	895
Jerry L. Bona and Fred B. Weissler , Traveling fronts of a conservation law with hyper-dissipation	917
Messoud Efendiev and Takasi Senba , On the well posedness of a class of PDEs including porous medium and chemotaxis effect	937
Vladislav Zheligovsky , A priori bounds for Gevrey–Sobolev norms of space-periodic three-dimensional solutions to equations of hydrodynamic type .	955
Nghiem V. Nguyen and Zhi-Qiang Wang , Orbital stability of solitary waves for a nonlinear Schrödinger system	977
