

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 19, Numbers 7-8

July/August 2014

M. Astudillo, Asymptotic limits for the doubly nonlinear equation	613
Phillip S. Harrington and Andrew Raich, Sobolev spaces and elliptic theory on unbounded domains in $\mathbb{R}^n$	635
Giovanni Cupini, Paolo Marcellini, and Elvira Mascolo, Existence and regularity for elliptic equations under p, q -growth	693
R. Chertovskih, A.C.L. Chian, O. Podvigina, E.L. Rempel, and V. Zheligovsky, Existence, uniqueness, and analyticity of space-periodic solutions to the regularized long-wave equation	725
Anna Lisa Amadori and Francesca Gladiali, Bifurcation and symmetry breaking for the Henon equation	755
Alessia E. Kogoj, Ermanno Lanconelli, and Giulio Tralli, An inverse mean value property for evolution equations	783
