

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Rate of convergence to equilibrium of fractional driven stochastic differential equations with some multiplicative noise	<i>J. Fontbona and F. Panloup</i>	503–538
Decomposition of Lévy trees along their diameter	<i>T. Duquesne and M. Wang</i>	539–593
Simple CLE in doubly connected domains	<i>S. Sheffield, S. S. Watson and H. Wu</i>	594–615
Scaling limits of coalescent processes near time zero	<i>B. Şengül</i>	616–640
Path-dependent infinite-dimensional SDE with non-regular drift: An existence result	<i>D. Dereudre and S. Roelly</i>	641–657
A dynamical Curie–Weiss model of SOC: The Gaussian case	<i>M. Gorný</i>	658–678
Poisson approximation of point processes with stochastic intensity, and application to nonlinear Hawkes processes	<i>G. L. Torrisi</i>	679–700
Any orthonormal basis in high dimension is uniformly distributed over the sphere	<i>S. Goldstein, J. L. Lebowitz, R. Tumulka and N. Zanghi</i>	701–717
Typical behavior of the harmonic measure in critical Galton–Watson trees	<i>S. Lin</i>	718–752
One-dependent coloring by finitary factors	<i>A. E. Holroyd</i>	753–765
Supercritical behavior of asymmetric zero-range process with sitewise disorder	<i>C. Babadoran, T. Mountford, K. Ravishankar and E. Saada</i>	766–801
Point process convergence for branching random walks with regularly varying steps	<i>A. Bhattacharya, R. S. Hazra and P. Roy</i>	802–818
Moment asymptotics for parabolic Anderson equation with fractional time-space noise: In Skorokhod regime	<i>X. Chen</i>	819–841
Conditional speed of branching Brownian motion, skeleton decomposition and application to random obstacles	<i>M. Öz, M. Çağlar and J. Engländer</i>	842–864
SPDEs on narrow domains and on graphs: An asymptotic approach	<i>S. Cerrai and M. Freidlin</i>	865–899
Scaling limits of random outerplanar maps with independent link-weights	<i>B. Stufler</i>	900–915
Unimodality for free Lévy processes	<i>T. Hasebe and N. Sakuma</i>	916–936
Maximal inequalities for stochastic convolutions driven by compensated Poisson random measures in Banach spaces	<i>J. Zhu, Z. Brzeźniak and E. Hausenblas</i>	937–956
Strong stationary times for one-dimensional diffusions	<i>L. Miclo</i>	957–996
Homogenization via sprinkling	<i>I. Benjamini and V. Tassion</i>	997–1005
