

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Global contractivity for Langevin dynamics with distribution-dependent forces and uniform in time propagation of chaos	<i>K. Schub</i>	753–789
Fluctuations for mean field limits of interacting systems of spiking neurons	<i>E. Löcherbach</i>	790–823
Empirical optimal transport between different measures adapts to lower complexity <i>S. Hundrieser, T. Staudt and A. Munk</i>		824–846
Central limit theorems for general transportation costs	<i>E. del Barrio, A. González-Sanz and J.-M. Loubes</i>	847–873
Concentration of quasi-stationary distributions for one-dimensional diffusions with applications <i>Z. Shen, S. Wang and Y. Yi</i>		874–903
On the Itô–Alekseev–Gröbner formula for stochastic differential equations <i>A. Hudde, M. Hutzentbaler, A. Jentzen and S. Mazzonetto</i>		904–922
Matsumoto–Yor and Dufresne type theorems for a random walk on positive definite matrices <i>J. Arista, E. Bisi and N. O’Connell</i>		923–945
Linear spectral statistics of sequential sample covariance matrices	<i>N. Dörnemann and H. Dette</i>	946–970
Robust subgaussian estimation with VC-dimension	<i>J. Depersin</i>	971–989
Large deviations for random matrices in the orthogonal group and Stiefel manifold with applications to random projections of product distributions	<i>Z. Kabluchko and J. Prochno</i>	990–1024
Random sorting networks: Edge limit	<i>V. Gorin and J. Xu</i>	1025–1047
Log determinant of large correlation matrices under infinite fourth moment	<i>J. Heiny and N. Parolya</i>	1048–1076
Exponential concentration for the number of roots of random trigonometric polynomials <i>H. H. Nguyen and O. Zeitouni</i>		1077–1089
On measures strongly log-concave on a subspace	<i>P. Bizeul</i>	1090–1100
Metropolis–Hastings transition kernel couplings	<i>J. O’Leary and G. Wang</i>	1101–1124
A central limit theorem for the variation of the sum of digits	<i>Y. Hosten, É. Janvresse and T. de la Rue</i>	1125–1149
Number of visits in arbitrary sets for ϕ-mixing dynamics	<i>S. Gallo, N. Haydn and S. Vaienti</i>	1150–1187
Active phase for activated random walks on the lattice in all dimensions	<i>N. Forien and A. Gaudillière</i>	1188–1214
Hydrodynamics of the t-PNG model via a colored t-PNG model	<i>H. Drillick and Y. Lin</i>	1215–1245
Non-stationary KPZ equation from ASEP with slow bonds	<i>K. Yang</i>	1246–1294
Convergence of limit shapes for 2D near-critical first-passage percolation	<i>C.-L. Yao</i>	1295–1333
Random walks in Dirichlet environments on \mathbb{Z} with bounded jumps	<i>D. J. Stolin</i>	1334–1355
Fractal properties of Aldous–Kendall random metric	<i>G. Blanc</i>	1356–1386
The Seneta–Heyde scaling for supercritical super-Brownian motion	<i>H. Hou, Y.-X. Ren and R. Song</i>	1387–1417
A branching process with deletions and mergers that matches the threshold for hypercube percolation <i>L. Eslava, S. Penington and F. Skerman</i>		1418–1457
Generalized range of slow random walks on trees	<i>P. Andreoletti and A. Kagan</i>	1458–1509
