

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Identification of the Polaron measure in strong coupling and the Pekar variational formula CHIRANJIB MUKHERJEE AND S. R. S. VARADHAN 2119
- On the absolute continuity of random nodal volumes
JÜRGEN ANGST AND GUILLAUME POLY 2145
- On the number of maximal paths in directed last-passage percolation
HUGO DUMINIL-COPIN, HARRY KESTEN, FEDOR NAZAROV,
YUVAL PERES AND VLADAS SIDORAVICIUS 2176
- Inverting the Markovian projection, with an application to local stochastic volatility models DANIEL LACKER, MYKHAYLO SHKOLNIKOV AND JIACHENG ZHANG 2189
- Deterministic walks in random environment
ROMAIN AIMINO AND CARLANGLO LIVERANI 2212
- Martingale Benamou–Brenier: A probabilistic perspective
JULIO BACKHOFF-VERAGUAS, MATHIAS BEIGLBOCK,
MARTIN HUESMANN AND SIGRID KÄLLBLAD 2258
- Fractional diffusion limit for a kinetic equation with an interface
TOMASZ KOMOROWSKI, STEFANO OLLA AND LENYA RYZHIK 2290
- Limit profile for random transpositions LUCAS TEYSSIER 2323
- Solution of the Kolmogorov equation for TASEP
MIHAI NICA, JEREMY QUASTEL AND DANIEL REMENIK 2344
- Anomalous diffusion for multi-dimensional critical kinetic Fokker–Planck equations NICOLAS FOURNIER AND CAMILLE TARDIF 2359
- Nonlinear large deviation bounds with applications to Wigner matrices and sparse Erdős–Rényi graphs FANNY AUGERI 2404
- Mixing time of the adjacent walk on the simplex
PIETRO CAPUTO, CYRIL LABBÉ AND HUBERT LACONIN 2449
- The CLT in high dimensions: Quantitative bounds via martingale embedding
RONEN ELKAN, DAN MIKULINCER AND ALEX ZHAI 2494
- Large deviations and localization of the microcanonical ensembles given by multiple constraints KYEONGSIK NAM 2525
