## Articles

|   |      |
|---|------|
| Stationary distributions of multi-type totally asymmetric exclusion processes<br>PABLO A. FERRARI AND JAMES B. MARTIN   | 807  |
| Large deviations for the chemical distance in<br>supercritical Bernoulli percolation . . . . .<br>OLIVIER GARET AND RÉGINE MARCHAND   | 833  |
| Statistical mechanical systems on complete graphs, infinite exchangeability,<br>finite extensions and a discrete finite moment problem<br>THOMAS M. LIGGETT, JEFFREY E. STEIF AND BÁLINT TÓTH | 867  |
| On the continuity of local times of Borel<br>right Markov processes . . . . .<br>NATHALIE EISENBAUM AND HAYA KASPI  | 915  |
| Coupling all the Lévy stochastic areas of multidimensional<br>Brownian motion . . . . .<br>WILFRID S. KENDALL   | 935  |
| Moderate deviations and laws of the iterated logarithm for the local times of<br>additive Lévy processes and additive random walks . . . . .<br>XIA CHEN                                      | 954  |
| Exact Hausdorff measure on the boundary of<br>a Galton–Watson tree . . . . .<br>TOSHIRO WATANABE  | 1007 |
| Conditioned square functions for<br>noncommutative martingales . . . . .<br>NARCISSE RANDRIANANTOANINA  | 1039 |
| Backward stochastic differential equations with random stopping<br>time and singular final condition . . . . .<br>A. POPIER   | 1071 |
| A weakness in strong localization for Sinai’s walk . . . . .<br>ZHAN SHI AND OLIVIER ZINDY  | 1118 |
| Convergence of Markov processes near saddle fixed points . . . . .<br>AMANDA G. TURNER  | 1141 |
| Good rough path sequences and applications to anticipating stochastic calculus<br>LAURE COUTIN, PETER FRIZ AND NICOLAS VICTOIR  | 1172 |
| On the paper “Weak convergence of some classes<br>of martingales with jumps” . . . . .<br>YOICHI NISHIYAMA  | 1194 |
