

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Jerzy Neyman Memorial Lecture

Some thoughts on empirical Bayes estimation HERBERT ROBBINS 713

Articles

- Additive and multiplicative models and interactions ... J. N. DARROCH AND T. P. SPEED 724
- Symmetric statistics, Poisson point processes, and multiple Wiener integrals E. B. DYNKIN AND A. MANDELBAUM 739
- A characterization of certain statistics in exponential models whose distributions depend on a sub-vector of parameters only SHAUL K. BAR-LEV 746
- Exponential models with affine dual foliations O. BARNDORFF-NIELSEN AND P. BLAESILD 753
- Reproductive exponential families O. BARNDORFF-NIELSEN AND P. BLAESILD 770
- The geometry of mixture likelihoods, part II: the exponential family BRUCE G. LINDSAY 783
- Second order efficiency of minimum contrast estimators in a curved exponential family SHINTO EGUCHI 793
- Asymptotic distribution theory for Cox-type regression models with general relative risk form ROSS L. PRENTICE AND STEVEN G. SELF 804
- Improving on inadmissible estimators in the control problem L. MARK BERLINER 814
- Second order approximation to the risk of a sequential procedure ADAM T. MARTINSEK 827
- Canonical correlations of past and future for time series: definitions and theory NICHOLAS P. JEWELL AND PETER BLOOMFIELD 837
- Canonical correlations of past and future for time series: bounds and computation NICHOLAS P. JEWELL, PETER BLOOMFIELD AND FLAVIO C. BARTMANN 848
- Consistency properties of least squares estimates of autoregressive parameters in ARMA models GEORGE C. TIAO AND RUEY S. TSAY 856
- Order estimation in Arma-models by Lagrangian multiplier tests B. M. PÖTSCHER 872
- Bayesian bioassay design LYNN KUO 886
- The equivalence of weak, strong and complete convergence in L_1 for kernel density estimates LUC DEVROYE 896
- A normal limit law for a nonparametric estimator of the coverage of a random sample WARREN W. ESTY 905
- On the joint asymptotic distribution of extreme midranges C. ZACHARY GILSTEIN 913
- Minimum distance estimation in a linear regression model H. KOUL AND T. DEWET 921
- A modified Kolmogorov-Smirnov test sensitive to tail alternatives DAVID M. MASON AND JOHN H. SCHUENEMEYER 933
- Missing data in the one-population multivariate normal patterned mean and covariance matrix testing and estimation problem TED H. SZATROWSKI 947
- Asymptotic theory of systematic sampling RONALDO IACHAN 959
- On the optimality of spring balance weighing designs MIKE JACROUX AND WILLIAM NOTZ 970

Short Communications

- Characterization of type from maximal invariant spectra CHRISTOPHER G. SMALL 979
- Identifiability of finite mixtures for directional data JOHN T. KENT 984
- The estimation of the hazard function from randomly censored data by the kernel method MARTIN A. TANNER AND WING HUNG WONG 989
- A note on the variable kernel estimator of the hazard function from randomly censored data MARTIN A. TANNER 994
- Inference on means using the bootstrap G. JOGESH BABU AND KESAR SINGH 999
- Orthogonal series methods for both qualitative and quantitative data PETER HALL 1004
- Monotonicity in the noncentrality parameter of the ratio of two noncentral t -densities ROBERT A. WIJSMAN 1008
- On the smoothness properties of the best linear unbiased estimate of a stochastic process observed with noise ROBERT KOHN AND CRAIG F. ANSLEY 1011

Notes and Corrections

- Autocorrelation, autoregression and autoregressive approximation AN HONG-ZHI, CHEN ZHAO-GUO AND E. J. HANNAN 1018

Vol. 11, No. 3—September 1983
