PAST EDITORS

THE ANNALS OF MATHEMATICAL STATISTICS

H. C. CARVER, 1930–1938

S. S. WILKS, 1938–1949

T. W. ANDERSON, 1950–1952

E. L. LEHMANN, 1953–1955

T. E. HARRIS, 1955–1958

WILLIAM KRUSKAL, 1958–1961

J. L. HODGES, JR., 1961–1964

D. L. BURKHOLDER, 1964–1967

Z. W. BIRNBAUM, 1967–1970

INGRAM OLKIN, 1970–1972

THE ANNALS OF STATISTICS

INGRAM OLKIN, 1972–1973

I. R. SAVAGE, 1974–1976

RUPERT G. MILLER, JR., 1977–1979

DAVID V. HINKLEY, 1980–1982

MICHAEL D. PERLMAN, 1983–1985

WILLEM R. VAN ZWET, 1986–1988

ARTHUR COHEN, 1989–1991

MICHAEL WOODROOFE, 1992–1994

LAWRENCE D. BROWN AND

JOHN A. RICE, 1995–1997

JAMES O. BERGER AND

HANS R. KÜNSCH, 1998–2000

JOHN I. MARDEN AND

JON A. WELLNER, 2001–2003

EDITORIAL POLICY

The Annals of Statistics aims to publish research papers of highest quality reflecting the many facets of contemporary statistics. Primary emphasis is placed on importance and originality, not on formalism.

The discipline of statistics has deep roots in both mathematics and in substantive scientific fields. Mathematics provides the language in which models and the properties of statistical methods are formulated. It is essential for rigor, coherence, clarity and understanding. Consequently, our policy is to continue to play a special role in presenting research at the forefront of mathematical statistics, especially theoretical advances that are likely to have a significant impact on statistical methodology or understanding. Substantive fields are essential for continued vitality of statistics, since they provide the motivation and direction for most of the future developments in statistics. We thus intend to also publish papers relating to the role of statistics in interdisciplinary investigations in all fields of natural, technical and social sciences. A third force that is reshaping statistics is the computational revolution, and the *Annals* will also welcome developments in this area. Submissions in these two latter categories will be evaluated primarily by the relevance of the issues addressed and the creativity of the proposed solutions.

Lucidity and conciseness of presentation are important elements in the evaluation of submissions. The introduction of each paper should be accessible to a wide range of readers. It should thus discuss the context and importance of the issues addressed and give a clear, nontechnical description of the main results. In some papers it may, for example, be appropriate to present special cases or specific examples prior to general, abstract formulations, while in other papers discussion of the general scientific context of a problem might be a helpful prelude to the body of the paper.

Instructions for submission of papers to be considered for publication are given at *The Annals of Statistics* web page <http://www.imstat.org/aoas/>.
