

NOTES

Professor J. H. M. Wedderburn, of Princeton University, has been appointed an associate editor of this Bulletin. Professors R. W. Brink, of the University of Minnesota, and J. D. Tamarkin, of Dartmouth College, have been appointed associate editors of the Transactions of this Society.

The concluding number of volume 28 of the Transactions of this Society (October, 1926) contains the following papers: *A boundary value problem for a system of ordinary linear differential equations of the first order*, by G. A. Bliss; *On the theory of integral equations with discontinuous kernels*, by R. E. Langer; *The figuratrix in the calculus of variations*, by P. R. Rider; *On the existence of fields in boolean algebras*, by B. A. Bernstein; *Asymmetric displacement of a vector*, by J. M. Thomas; *Tensors determined by a hypersurface in Riemann space*, by H. Levy; *A comparison of the series of Fourier and Birkhoff*, by M. H. Stone; *Analytic approximations to topological transformations*, by P. Franklin and N. Wiener.

The concluding number of volume 48 of the American Journal of Mathematics (October, 1926) contains: *Regular maps on an anchor ring*, by H. R. Brahana; *Determination of the type of the tricrunodal quartic by means of its invariants*, by L. T. Moore; *Subgroups of index p^2 contained in a group of order p^m* , by G. A. Miller; *Mapping by means of linear systems of curves invariant under Cremona involutions*, by T. L. Bennett; *Algebraic and transcendental equations connected with the form of stream lines*, by H. Bateman.

The Journal für die reine und angewandte Mathematik, founded in 1826 by August Leopold Crelle, is celebrating its centenary by the publication of a special Jubiläumsband.

On the occasion of the two hundredth anniversary of the death of Sir Isaac Newton, which occurs on March 20, 1927, a meeting will be held under the auspices of the (British) Mathematical Association at Grantham, near Newton's birthplace. Addresses will be delivered by Sir J. J. Thomson and others, on various aspects of his work.

Dr. Horace Lamb has been elected president of the Cambridge Philosophical Society.

Among the officers elected at the Philadelphia meeting of the American Association for the Advancement of Science are the following: Professor A. A. Noyes, of the California Institute of Technology, president; Professor Dunham Jackson, of the University of Minnesota, vice-president of Section A (mathematics); Professor A. H. Compton, of the University of Chicago, vice-president of Section B (physics); Dr. W. S. Adams, of Mount Wilson Observatory, vice-president of Section D (astronomy). Professor L. E. Dickson was elected a member of the Council, and Professor Oswald Veblen a member of the Committee on Grants.
