PUBLISHED UNDER THE AUSPICES OF HARVARD UNIVERSITY

---

Issued quarterly. Subscription price, \$2.00 a volume. Address: THE ANNALS OF MATHEMATICS, 2 University Hall, Cambridge, Mass.; London, Longmans, Green & Co., 39 Paternoster Row; Leipzig, Otto Harrassowitz, Querstrasse 14.

---

THE ANNALS OF MATHEMATICS, while it is intended to appeal to the general mathematical public rather than to the highly trained specialist, seeks both to promote the spirit of research and to render more effective the work of the individual investigator, whether student or teacher. Hence, although highly technical articles which can appeal only to a very few readers are avoided, however great their intrinsic value, short research articles so written as to be intelligible and interesting to a considerable number of readers of the ANNALS are always welcomed; as are articles in which a valuable extension of methods already employed has been made, or in which the author has obtained new results of general interest in a field hitherto but little explored.

One of the most valuable features of the ANNALS, however, and one of the greatest aids to the teacher and to the serious student of mathematics is the frequent publication of expository articles which, while containing little or no original matter, give a clear presentation of some important but not readily accessible field of mathematics or a rigorous treatment of some subject which is ordinarily treated in an unsatisfactory manner.
