Nordisk Matematisk Tidskrift. Vol. 1, no. 1. Oslo, 1953. 64 pp.
    Foreign subscriptions, 22 Norwegian crowns per volume of four
    numbers.

These two journals replace Matematisk Tidsskrift A and B and
Norsk Matematisk Tidsskrift. They are published by the five
Scandinavian mathematical societies, the second in conjunction with
the Scandinavian associations of teachers of mathematics. They are
intended to take, more or less, the places in Scandinavia which are
occupied in the U.S.A. by this Bulletin together with Proceedings of
the American Mathematical Society and by the American Mathe-
matical Monthly, respectively. Thus Mathematica Scandinavica
publishes short research and expository papers (in English, French or
German); as far as this portion goes, it differs from Proceedings of
the American Mathematical Society chiefly in that the papers are
supposed to be mostly by Scandinavian authors (all but one in this
issue are); they are fewer in number (17 in this issue), more restricted
in subject matter (reflecting the special interests of Scandinavian
mathematicians, they are mostly in analysis), and more interesting
(possibly reflecting the lesser pressure for publication which dis-
tinguishes European from American mathematical life). Mathe-
matica Scandinavica also contains problems, book reviews, and notes
on mathematics in Scandinavia; the latter include, in the first issue,
a useful directory of mathematicians at Scandinavian institutions of
higher education and research. The supplementary pages at the end
contain, on one side, abstracts of the papers in this issue (suitable
for cutting out and mounting on cards); on the other side, announce-
ments of new publications.

Nordisk Matematisk Tidskrift corresponds more closely to its
British counterpart, the Mathematical Gazette, than to the American
Mathematical Monthly; it covers secondary-school as well as college
mathematics. The contents range from short research papers on sub-
jects of general interest to discussions on teaching problems. The
languages of this journal are Danish, Norwegian and Swedish, al-
though English, French and German are also admitted, and articles
in the Scandinavian languages are provided with English summaries.

                                                R. P. Boas, Jr.

Brief Mention

Les systèmes axiomatiques de la théorie des ensembles. By H. Wang
    and R. McNaughton. (Collection de Logique Mathématique, Série
    A.) Paris, Gauthier-Villars, 1953. 56 pp. 750 fr.
