

Contents

A. DESGAGNÉ and P. GAGNON

Bayesian robustness to outliers in linear regression and ratio estimation 205

K. K. DEY and S. BHATTACHARYA

A brief review of optimal scaling of the main MCMC approaches and optimal scaling of additive TMCMC under non-regular cases 222

Q. LIU, C. A. MCGRORY and P. W. J. BAXTER

The coresets variational Bayes (CVB) algorithm for mixture analysis 267

K. K. SAID, W. NING and Y. TIAN

Modified information criterion for testing changes in skew normal model 280

E. ATHAYDE, A. AZEVEDO, M. BARROS and V. LEIVA

Failure rate of Birnbaum–Saunders distributions: Shape, change-point, estimation and robustness 301

F. CRIBARI-NETO and R. V. FONSECA

A new log-linear bimodal Birnbaum–Saunders regression model with application to survival data 329

B. MALLEIN

Necessary and sufficient conditions for the convergence of the consistent maximal displacement of the branching random walk 356

R. C. P. DOS REIS, E. A. COLOSIMO and G. L. GILARDONI

Hierarchical modelling of power law processes for the analysis of repairable systems with different truncation times: An empirical Bayes approach 374

D. AHLBERG

A temporal perspective on the rate of convergence in first-passage percolation under a moment condition 397

L. RIVAS and M. GALEA

Influence measures for the Waring regression model 402
