

New Series

Progress in Physics

Edited by
Arthur Jaffe
David Ruelle

Progress in Physics is a new series which provides an up-to-date perspective on current trends and results of research in experimental and theoretical physics. The volumes report on original research with expository treatment of particular subject areas. Publication of innovative teaching material, including lecture notes which could be developed into textbooks, will assist academics in the development of teaching curricula. Reprints of important contributions that have been out of print for some time will also be considered.

Designed as a service to the international scientific community, the series provides researchers with current information and graduate students with a firsthand account of new developments. The volumes will be reasonably priced and produced quickly for rapid distribution.

Volume 1

Pierre Collet
Jean-Pierre Eckmann

Iterated Maps on the Interval as Dynamical Systems

1980, 256 pages, Hardcover
sFr. 27.-/DM 30.-/\$14.00
ISBN 3-7643-3026-0

Volume 2

Arthur Jaffe
Clifford Taubes

Vortices and Monopoles

Structure of Static Gauge Theories

1980, 275 pages, Hardcover
sFr. 27.-/DM 30.-/\$14.00
ISBN 3-7643-3025-2
