

Communications in Mathematical Physics

Volume 81 Number 2 1981

- F. David Cancellations of Infrared Divergences in the Two-Dimensional Non-Linear σ Models 149
- R. T. Glassey, W. A. Strauss Some Global Solutions of the Yang—Mills Equations in Minkowski Space 171
- B. A. Kupershmidt, G. Wilson Conservation Laws and Symmetries of Generalized Sine-Gordon Equations 189
- J. Rauch, M. Reed Jump Discontinuities of Semilinear, Strictly Hyperbolic Systems in Two Variables: Creation and Propagation 203
- F. Ledrappier Some Relations Between Dimension and Lyapounov Exponents 229
- A. M. Perelomov Lax Representation for the Systems of S. Kowalevskaya Type 239
- P. A. Perry Propagation of States in Dilation Analytic Potentials and Asymptotic Completeness 243
- P. Collet, J.-P. Eckmann, L. Thomas A Note on the Power Spectrum of the Iterates of Feigenbaum's Function 261
- G. 't Hooft Some Twisted Self-Dual Solutions for the Yang-Mills Equations on a Hypertorus 267
- J. Fröhlich, C. Pfister On the Absence of Spontaneous Symmetry Breaking and of Crystalline Ordering in Two-Dimensional Systems 277
- Indexed in Current Contents
