This journal is devoted to research in probability theory on an advanced level. In addition, it publishes papers from other fields such as optimization theory, statistical mechanics, ergodic theory, and measure theory or analytic number theory when they are closely connected with basic problems in probability theory. Fundamental results in mathematical statistics are often included.

Fields of interest: Probability theory, optimization theory, statistical mechanics, ergodic theory, measure theory or analytic number theory when they are closely connected with basic problems in probability theory, fundamental results in mathematical statistics
