

Spectral Statistics on Zoll Surfaces

Alejandro Uribe^{1*} and Steven Zelditch^{2**}

¹ Mathematics Department, University of Michigan, Ann Arbor, MI 48109, and Institute for Advanced Study, Princeton, NJ 08540, USA

² Mathematics Department, Johns Hopkins University, Baltimore, MD 21218, USA

Received June 15, 1992; in revised form November 23, 1992

Contents

1. Level Spacings and Correlation Functions	314
2. Spectrum in the Completely Integrable Case	318
2.1. Classical complete integrability	318
2.2. Quantum integrability	321
2.3. Some conjectures and results on the lsd and kcf's	322
3. Pair Correlation of a Zoll Metric	324
3.1. Statement of the result	324
3.2. Reduction to the trace formula	326
3.3. Period manifolds and holonomies	328
3.4. The pair correlation density	329
3.4.1 The trace formula for periodic flows	330
3.4.2 Computation of the pcf	331
4. The Trace Formula for Commuting Operators	333
4.1. Preliminary results	333
4.2. Reduction	335
4.3. Conclusions	336
5. k-level Correlation Functions	338
5.1. Statement of the formula	338
5.2. Reduction to the trace formula	339
5.3. The end of the proof	340
6. On the Level Spacings Distribution	344
