

# Applied Mathematics & Optimization

AN INTERNATIONAL JOURNAL

**Subscription Information:**

ISSN 0095-4616 Title No. 245  
1987, Vols. 15 + 16  
(3 issues each): DM 506,-  
plus carriage charges

**Founded by** A. V. Balakrishnan, J. L. Lions, G. I. Marchuk,  
L. S. Pontryagin

**Managing Editor:** G. Kallianpur, Chapel Hill

**Associate Editors:** A. Bensoussan, Rocquencourt; R. Conti, Firenze; W. Fleming, Providence; P. Henrici, Zürich; K. Itô, Kyoto; P. Kall, Zürich; D. Kinderlehrer, Minneapolis; I. Lasieka, Gainesville; S. K. Mitter, Cambridge, MA; Yu. A. Rozanov, Moscow; A. Ruberti, Roma; J. Stoer, Würzburg; R. Temam, Orsay; R. Triggiani, Gainesville; S. R. S. Varadhan, New York; J. Westcott, London; M. Yamaguti, Kyoto; M. Zakai, Haifa

**Applied Mathematics and Optimization** publishes original work on mathematical problems of optimization. While motivated by practical applications, the problems discussed reflect the journal's commitment to mathematical precision.

**Applied Mathematics and Optimization** includes contributions that are complete in both theoretical and applied aspects, papers dealing with applied mathematical topics with a practical implication, reports concerning modeling and identification of systems, and critical surveys of new advances in theory and application. The distinguished international editorial board selects papers which include applications of mathematics to topics such as physical systems, chemical and biochemical systems, environmental systems, problems of optimum design, biomedical systems, aerospace systems, public service systems, and socio-economic systems.
