

R. Seroul, S. Levy

A Beginner's Book of T_EX

Translated from the French by S. Levy

1991. XII, 282 pp. Softcover DM 58,- ISBN 3-540-97562-4

This book is a friendly introduction to T_EX, the powerful typesetting system designed by Don Knuth. It is addressed primarily to beginners, but it contains much information that will be useful to aspiring T_EX “wizards”. Moreover, the authors kept firmly in mind the diversity of backgrounds that characterizes T_EX users: authors in the sciences and in the humanities, secretaries, technical typists . . .

The book contains a careful explanation of all fundamental concepts and commands, but also a wealth of commented examples and “tricks” based on the authors’ long experience with T_EX. The attentive reader will quickly be able to create a table, or customize the appearance of the page, or code even the most complicated formula. The last third of the book is devoted to a Dictionary/Index, summarizing all the material in the text and going into greater depth in many areas.
