Number 1

Simulation of an integro-differential equation and application in estimation of ruin probability with mixed fractional Brownian motion CHUNHAO CAI AND WEILIN XIAO	1
Solvability for generalized nonlinear functional integral equations in Banach spaces with applications AMAR DEEP, DEEPMALA AND JAMAL REZAEI ROSHAN	19
Stability and approximation of almost automorphic solutions on time scales for the stochastic Nicholson's blowflies model SONIYA DHAMA, SYED ABBAS AND RATHINASMAY SAKTHIVEL	31
A method of solving a nonlinear boundary value problem for the Fredholm integro-differential equation DULAT S. DZHUMABAEV AND SANDUGASH MYNBAYEVA	53
On quasinormality of singular integral operators with Cauchy kernel on L^2 EUNGIL KO AND JI EUN LEE	77
Numerical analysis of asymptotically convolution evolutionary integral equations ELEONORA MESSINA AND ANTONIA VECCHIO	91
Local existence and global nonexistence of a solution for a Love equation with infinite memory KHALED ZENNIR, TOSIYA MIYASITA AND PERIKLES PAPADOPOULOS	117
