

# NOTRE DAME JOURNAL OF FORMAL LOGIC

VOLUME 28, 1987

## VOLUME CONTENTS

<b>Anderson, C. Anthony</b> , Semantical antimonies in the logic of sense and denotation	99–114
<b>Bell, David</b> , Thoughts	36–50
<b>Bull, R. A.</b> , Survey of generalizations of Urquhart semantics	220–237
<b>Burrieza, A. and Juan C. León</b> , Modal trees: Correction to a decision procedure for $S5$ (and $T$ )	385–391
<b>Butrick, Richard</b> , A system of predicate logic with trans-atomic units	431–438
<b>Currie, Gregory</b> , Remarks on Frege's conception of inference	55–68
<b>Daniels, Charles B.</b> , A first-order logic with no logical constants	408–413
<b>Doets, Kees</b> , On $n$ -equivalence of binary trees	238–243
<b>Flannery, Kevin L.</b> , A rationale for Aristotle's notion of perfect syllogisms	455–471
<b>Gold, Bonnie</b> , Relatively diophantine correct models of arithmetic	291–296
<b>Goodman, Nicolas D.</b> , Intensions, Church's Thesis, and the formalization of mathematics	473–489
<b>Hand, Michael</b> , <i>Other</i> and <i>Else</i> : Restrictions on quantifier domains in game-theoretical semantics	423–430
<b>Helman, Glen</b> , On the equivalence of proofs involving identity	297–321
<b>Hill, Christopher S.</b> , Rudiments of a theory of reference	200–219
<b>Howard, Paul E. and Mary Yorke</b> , Maximal $P$ -subgroups and the axiom of choice	276–283
<b>Hugly, Philip and Charles Sayward</b> , Do we need models?	414–422
<b>Humberstone, I. L.</b> , The model logic of "all and only"	177–188
<b>Jurcic, Joseph</b> , On defining sentential connectives	189–199
<b>Kapetanović, Miodrag and Aleksandar Krapež</b> , More on trees and finite satisfiability: The taming of terms	392–394
