

A — ALGEBRA AND NUMBER THEORY

M. A. Bardwell, <i>The o-primitive components of a regular ordered permutation group</i>	261
G. Loupias, <i>Cohomology over Banach crossed products. Application to bounded derivations and crossed homomorphisms</i>	333
J. D. Sally, <i>Super-regular sequences</i>	465

B — ANALYSIS

S. C. Bagchi and A. Sitaram, <i>Spherical mean periodic functions on semi simple Lie groups</i>	241
P. W. Bates and J. R. Ward, Jr., <i>Periodic solutions of higher order systems</i>	275
T. A. Farmer, <i>On the reduction of certain degenerate principal series representations of $SP(n, C)$</i>	291
A. L. T. Paterson, <i>Amenable groups for which every topological left invariant mean is invariant</i>	391
C. R. Putnam, <i>Operators satisfying a G_1 condition</i>	413
W. Rupp, <i>Riesz-presentation of additive and σ-additive set-valued measures</i>	445
A. M. Russell, <i>A commutative Banach algebra of functions of generalized variation</i>	455

D — GEOMETRY

R. Löwen, <i>Symmetric planes</i>	367
---	-----

G — TOPOLOGY

B. J. Ball, <i>Quasicompactifications and shape theory</i>	251
J. Bruijning, <i>A characterization of dimension of topological spaces by totally bounded pseudometrics</i>	283
R. Jerrard and M. D. Meyerson, <i>Homotopy with M-functions</i>	305
J. Keesling and S. Mardešić, <i>A shape fibration with fibers of different shape</i>	319
J. R. Porter and R. G. Woods, <i>Ultra-Hausdorff H-closed extensions</i>	399
M. Rothenberg and J. Sondow, <i>Nonlinear smooth representations of compact Lie groups</i>	427
P. Shanahan, <i>On the signature of Grassmannians</i>	483

Our subject classifications are: A — ALGEBRA AND NUMBER THEORY; B — ANALYSIS;
 C — APPLIED MATHEMATICS; D — GEOMETRY; E — LOGIC AND FOUNDATIONS;
 F — STATISTICS; G — TOPOLOGY; H — COMBINATORICS
