Pacific Journal of Mathematics

Vol. 32, No. 2

| H. P. Allen and J. C. Ferrar, Jordan algebras and exceptional subalgebras of the exceptional algebra E_6 |
|--|
| David Barnette and Branko Grünbaum, Preassigning the |
| Robert Craggs, Involutions of the 3-sphere which fix 2-spheres |
| David W. Dean, Bor-Luh Lin and Ivan Singer, On k-shrink- |
| ing and k-boundedly complete bases in Banach spaces323 |
| Martin Engert, Finite dimensional translation invariant |
| K L Fields On the alobal dimension of residue ringe 245 |
| Howard Gorman, The Brandt condition and invertibility of |
| modules |
| Benjamin Halpern, A characterization of the circle and |
| A E Hurd A uniqueness theorem for second order angle |
| linear hyperbolic equations |
| James F. Hurley, Composition series in Chevalley algebras429 |
| Meira Lavie, Disconjugacy of linear differential equations |
| I D Lawson Lattices with no interval homomorphisms 450 |
| Roger C. McCann, A classification of center-foci |
| Evelyn R. McMillan, On continuity conditions for functions479 |
| G. N. de Oliveira, A conjecture and some problems on |
| permanents |
| group of order 44,352,000 |
| Jerome L. Paul, Extending homeomorphisms |
| T. B. Rushing, Unknotting unions of cells |
| Peter Russell, Forms of the affine line and its additive |
| Neil Shilkret. Non-Archimedean Gelfand theory 541 |
| A. E. Tong, Diagonal submatrices of matrix maps551 |
