

CONTENTS

Analogous function theories for the heat, wave, and Laplace equations	
By L.R. BRAGG AND W.D. DETTMAN	191
The radical of the restricted universal enveloping algebra of A_1	
By KWOK CHI WONG	215
Local uniform approximation by functions in a uniform algebra	
By DAVID M. WELLS	223
A class of meromorphic starlike functions	
By ALBERT E. LIVINGSTON	229
Typically-real functions of order p	
By M.B. HOLLINGSWORTH AND D.J. WRIGHT	241
Locally finite groups whose irreducible modules are finite dimensional	
By B. HARTLEY	255
The control measure problem and the universal measure topology	
By CECILIA H. BROOK	265
A pair of biorthogonal sets of polynomials	
By W.A. AL-SALAM AND A. VERMA	273
A preservation of integrability characterization theorem	
By WILLIAM D.L. APPLING	281
Linear transformations preserving sets of ranks	
By LEROY B. BEASLEY	299
Some rational continua	
By E.D. TYMCHATYN	309
On diophantine equations of the form $1 + 2^a = p^b q^c + 2^d p^e q^f$	
By LEO J. ALEX AND LORRAINE L. FOSTER	321
On the Grothendieck and Nikodym properties for algebras of Baire, Borel and universally measurable sets	
By W.H. GRAVES AND R.F. WHEELER	333
Asymptotic behavior of a reaction-diffusion equation in higher space dimensions	
By CHRISTOPHER K.R.T. JONES	355
Properties of Shepard's surfaces	
By R.E. BARNHILL, R.P. DUBE AND F.F. LITTLE	365
