JOURNAL OF MATHEMATICS

Volume 2

Spring 1972

Number 2

CONTENTS

The automorphism group of an extraspecial p -group	
By DAVID L. WINTER	159
Principal and antiprincipal solutions of selfadjoint differential systems and their reciprocals	
By CALVIN D. AHLBRANDT	169
Inverses, logarithms, and idempotents in $M(G)$	
By JOSEPH L. TAYLOR	183
Algebras of integrable functions. II	
By KENNETH O. LELAND	207
On $\Delta - m$ sets, almost periodic functions and group topologies	
By A.M. FINK AND G.H. MEISTERS	225
Preservation of coproducts by $\text{Hom}_R(M, -)$	
By TOM HEAD	235
Spaces with compact topologies	
By HAROLD REITER	239
Everywhere wild cells and spheres	
By T.B. RUSHING	249
Convolution in $K\{M_p\}$ spaces	
By CHARLES SWARTZ	259
On the weierstrass preparation theorem	
By MATTHEW O'MALLEY	265
Decomposition of direct sums of cyclic p -groups	
By DALTON TARWATER AND ELBERT WALKER	275
Some generalizations of Mehler's formula	
By H.M. SRIVASTAVA AND J.P. SINGHAL	283
Local algebraic invariants of Δ -sets	
By L.S. HUSCH	289
Separable polynomials over a commutative ring	
By FRANK DEMEYER	299
Abelian extensions of rings of positive characteristic	
By ANDY R. MAGID	311
Errata to "Quantum-mechanical scattering theory for short-range and coulomb interactions"	
By JOHN DOLLARD	317
