

ERRATUM

ERRATUM TO "MARKOV OPERATORS BAIRE FUNCTIONS" AND INVARIANT

Volume 13, (1983), pages 397-400

The main result, Theorem 1, is false, as simple examples show. E.g., let $Tf(x) = f(x^2)$ on $C[0, 1/2]$. The error occurs in the assertion " $f = F_p m - ae$." Since the same method is used in the proof of Theorem 2, the proof of that result is also wrong.

INFORMATION FOR AUTHORS

Manuscripts. Manuscripts submitted for publication must be typewritten or the equivalent, double-spaced, with ample margins. The author should submit two copies of his paper and retain one for himself. Ditto copies are not acceptable, although copies reproduced by other methods may be. As few handwritten characters as possible should be used. For questions of style, authors are referred to "A Manual for Authors," American Mathematical Society (1970). No footnotes may be used except one acknowledging financial support. Manuscripts may be submitted to *any* member of the editorial board. Such action is representation by the author that the manuscript has not been copyrighted, published, or submitted elsewhere.

To assist referees, two copies of unpublished or recently published references should also be submitted.

Joint Authorship. In the case of joint authorship, a letter should accompany the manuscript stating which author will assume responsibility for correspondence and proofreading.

Proofs. Authors receive only page proofs for corrections. In case excessive alterations of the original manuscript are requested, the author will be charged the cost of resetting.

Page Charges. A charge of \$35 per page will be made to help defray the cost of publication. This amount is charged to the institution or a contract supporting the research reported in the published paper. In no case is the author himself expected to pay the charge, nor is acceptance of his paper for publication dependent upon payment of the page charges.

The Rocky Mountain Mathematics Consortium is a nonprofit corporation with headquarters at Arizona State University. Its institutional members are:

University of Alberta
Arizona State University
University of Arizona
Brigham Young University
Colorado State University
University of Colorado
University of Denver
