

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Tails of the endpoint distribution of directed polymers	
<i>J. Quastel and D. Remenik</i>	1–17
Limits of multilevel TASEP and similar processes	
<i>V. Gorin and M. Shkolnikov</i>	18–27
Multiplicative functionals on ensembles of non-intersecting paths	
<i>A. Borodin, I. Corwin and D. Remenik</i>	28–58
Tunneling of the Kawasaki dynamics at low temperatures in two dimensions	
<i>J. Beltrán and C. Landim</i>	59–88
Moderate deviations for stabilizing functionals in geometric probability	
<i>P. Eichelsbacher, M. Raič and T. Schreiber</i>	89–128
Sharp asymptotics of metastable transition times for one dimensional SPDEs	
<i>F. Barret</i>	129–166
Exit times for integrated random walks	
<i>D. Denisov and V. Wachtel</i>	167–193
Stable limit laws for the parabolic Anderson model between quenched and annealed behaviour	
<i>J. Gärtner and A. Schnitzler</i>	194–206
Geometric versus non-geometric rough paths	
<i>M. Hairer and D. Kelly</i>	207–251
On rates of convergence in the Curie–Weiss–Potts model with an external field	
<i>P. Eichelsbacher and B. Martschink</i>	252–282
Average characteristic polynomials of determinantal point processes	
<i>A. Hardy</i>	283–303
The speed of a biased walk on a Galton–Watson tree without leaves is monotonic with respect to progeny distributions for high values of bias	
<i>B. Mebrdad, S. Sen and L. Zhu</i>	304–318
Stable laws and spectral gap properties for affine random walks	
<i>Z. Gao, Y. Guivarc’h and É. Le Page</i>	319–348
An algebraic construction of quantum flows with unbounded generators	
<i>A. C. R. Belton and S. J. Wills</i>	349–375
New insights into Approximate Bayesian Computation	
<i>G. Biau, F. Cérou and A. Guyader</i>	376–403
