## TABLE OF CONTENTS

On a Method of Testing the Hypothesis that an Observed Sample	
of n Variables and of Size N Has Been Drawn from a Speci-	
fied Population of the Same Number of Variables. John W.	
Fertig	113
On Confidence Ranges for the Median and Other Expectation Dis-	
tributions for Populations of Unknown Distribution Form.	
WILLIAM R. THOMPSON	122
The Sampling Distribution of the Coefficient of Variation.	
WALTER A. HENDRICKS WITH THE ASSISTANCE OF KATE W.	
Robey	
Some Notes on Exponential Analysis. H. R. GRUMMANN	133
On the Frequency Distribution of Certain Ratios. H. L. RIETZ.	145
Editorial. The Fundamental Nature and Proof of Sheppard's	
Adjustments	154
