Vol. 17, No. 1—January 1989

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute is to foster the development and dissemination
of the theory and applications of statistics and probability.*

OFFICERS AND EDITORS

Journals. The scientific journals of the Institute are *The Annals of Statistics, The Annals of
Probability,* and *Statistical Science.* The news organ of the Institute is *The Institute of Mathematical
Statistics Bulletin.*

Individual, Institutional and Corporate Memberships. All *individual members* receive *The IMS
Bulletin* for a basic annual dues rate of $30. Each member must elect to receive at least one scientific
journal for an additional amount, as follows: *Statistical Science* ($5), one *Annals* ($15) or both
Annals ($25). Dues allocations to each journal are set by Council resolution. Of the total dues paid,
$12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the
scientific journal(s) received. Memberships are available at a reduced rate (40% of regular rates) for
full-time students, permanent residents of developing countries and retired members. Retired
members may also elect to receive the *Bulletin* only for $12. *Institutional memberships* are available
to nonprofit organizations at $270 per year and *corporate memberships* are available to other
organizations at $585 per year. Institutional and corporate memberships include two multiple-reader-
ship copies of all IMS journals in addition to other benefits specified for each category (details
available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis.
Individual subscriptions are for the personal use of the subscriber and must be in the name of, paid
directly by and mailed to an individual. Individual subscriptions for 1989 are available to both
Annals and *Statistical Science* ($96), one *Annals* and *Statistical Science* ($60), both *Annals* ($72),
one *Annals* ($45), *Statistical Science* ($30) and *The IMS Bulletin* ($20). *General subscriptions* are for
libraries, institutions and any multiple-readership use. For 1989, all general subscriptions to one or
both *Annals* automatically include one subscription to *Statistical Science.* General subscriptions for
1989 are available to both *Annals* and *Statistical Science* ($180), one *Annals* and *Statistical Science*
($105), *Statistical Science* only ($45) and *The IMS Bulletin* ($30). Air mail rates for overseas delivery
of general subscriptions are $50 per title.

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal
or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided
that the base fee of $5.00 per copy, plus $.00 per page is paid directly to the Copyright Clearance
Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been
granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code
for users of the Transactional Reporting Service is: 0091-1798/88 $5.00 + .00.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscrip-
tions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal
(submissions, editorial content), or the Managing Editor (production).

EDITORIAL POLICY

The main purpose of *The Annals of Probability* and *The Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient. Also appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

THE ANNALS OF PROBABILITY

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Probability*. (For current address, see the latest issue of the *Annals*.) Three copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law" could have the running head, "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear. List your permanent mailing address after the references.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index*-1980. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\dfrac{a + b}{c + d}$, and $(2\pi)^{-1}$

or $1/(2\pi)$ to $\dfrac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred

to a^{b_c} and a_{b_c}, respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Révész, P. (1982). On the increments of Wiener and related processes. *Ann. Probab.* **10** 613–622.

In textual material, the format "... Révész (1982)..." should be used. Multiple references can be distinguished as "... Révész (1982a)...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to: AOP Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.
