**PUBLISHED BY THE SOCIETY**  
**LANCASTER, PA., AND NEW YORK**

**1922**

**Entered at the Post Office at Lancaster, Pa., as second class matter  
PUBLISHED MONTHLY, EXCEPT AUGUST AND SEPTEMBER**

**Whole No. 306. (See page 274.)**

**\$7.00 a year**

**NOTICE TO MEMBERS, LIBRARIANS, AND BOOKDEALERS**

**See explanation of the serial numbers on page 274 of the June issue.**

# THE AMERICAN MATHEMATICAL MONTHLY

OFFICIAL JOURNAL OF

THE MATHEMATICAL ASSOCIATION OF AMERICA

Is the Only Journal of Collegiate Grade in the Mathematical  
Field in This Country

This means that its mathematical contributions can be read and understood by those who have not specialized in mathematics beyond the Calculus.

The Historical Papers, which are numerous and of high grade, are based upon original research.

The Questions and Discussions, which are timely and interesting, cover a wide variety of topics.

Surveys of the contents of recent books and periodicals constitute a valuable guide to current mathematical literature.

The "Topics for Undergraduate Mathematical Clubs" have excited wide interest both in this country and in Great Britain.

The Notes and News cover a wide range of interest and information, both his country and in foreign countries.

The Problems and Solutions hold the attention and activity of a large number of persons who are lovers of mathematics for its own sake.

There are other journals suited to the Secondary field, and there are still others of technical scientific character in the University field; but the monthly is the only journal of Collegiate grade in America suited to the needs of the non-specialist in mathematics.

Sample copy and all information may be obtained from the

*Just Published*

## **Elements of Projective Geometry**

*(Wentworth-Smith Mathematical Series)*

**By GEORGE H. LING, University of Saskatchewan,  
GEORGE WENTWORTH and DAVID EUGENE  
SMITH.**

Prospective teachers of secondary mathematics, engineers, and students of the higher branches of mathematics will welcome this, the first textbook in projective geometry prepared especially in the interests of these three classes.

The presentation of the leading features is clear, simple, and sufficiently complete. It is scientific without being elaborate.
