## **Erratum**

## Exact Gravitational Field of the Infinitely Long Rotating Hollow Cylinder

## E. Frehland

Commun. math. Phys. 26, 307-320 (1972)

In Eq. (3.12b) S is defined by  $S = (1 + 2\sigma_z R_0 - 3\sigma_{(z)}^2 R_0^2)$ . In Eq. (4.3) the sign of  $\omega$  and  $v_{\rm rel.}$  should be changed. Hence line 15 on page 319 should read: "From (4.3) follows that sign  $\omega = -\operatorname{sign} b$ ..." and the first sentence on page 319: "... the reference system inside, given by  $v^{\mu}$ , rotates with respect to the reference frame  $w^{\mu}$  outside in the same direction as the cylinder."
