

- 661 **On the Caffarelli–Kohn–Nirenberg-type inequalities involving critical and supercritical weights**
Toshio Horiuchi and Peter Kumlin
- 743 **A refinement of Foreman’s four-vertex theorem and its dual version**
Gudlaugur Thorbergsson and Masaaki Umehara
- 759 **Missing terms in the weighted Hardy–Sobolev inequalities and its application**
Hiroshi Ando and Toshio Horiuchi
- 797 **Displaceability and the mean Euler characteristic**
Urs Frauenfelder, Felix Schlenk, and Otto van Koert
- 817 **Miyawaki’s F_{12} spinor L -function conjecture**
Bernhard Heim
- 829 **A remark on Kovács’s vanishing theorem**
Osamu Fujino
- 833 **A metric linear space is an open cone**
George Michael
- 839 **The Heisenberg ultrahyperbolic equation: K -finite and polynomial solutions**
Anthony C. Kable
- 895 **Index to Volume 52**
