

# CONFERENCE ANNOUNCEMENTS<sup>1</sup>

## THE OGDEN SYMPOSIUM: Summer Symposium in Real Analysis XXV

**WHEN:** May 22–26, 2001

**WHERE:** Ogden, UT

Weber State University and the *Real Analysis Exchange* are organizing Summer Symposium in Real Analysis XXV. The organizing committee consists of T.H. Steele and Paul Humke. The program will highlight hour long invited addresses by:

Professor Marianna Csornyei, Budapest  
Professor James Yorke, College Park  
Professor Professor Jaroslav Zeleny, Prague  
Professor Washek Pfeffer, Davis

Several 20 minutes communications are planned during the conference. We have applied to several sources for funding to enable us to provide limited support for graduate students, beginning researchers, and those whose research interests are contiguous to work in real analysis. Funds to support participants will be distributed with this goal specifically in mind and, in general, on a reverse seniority basis.

For online registration see: <http://www.stolaf.edu/people/analysis>. Even if you pre-registered for the conference we ask that you complete the registration forms. You can request a paper copy of the registration form by emailing to: [analysis@stolaf.edu](mailto:analysis@stolaf.edu) or by contacting the Conference Director:

Professor T.H. Steele Department of Mathematics  
Weber State University  
Ogden, UT 84408
