

Shin-ichi IZUMI
1904–1990

Shin-ichi IZUMI

1904–1990

Shin-ichi Izumi, professor emeritus of Tôhoku University and one of the former editors of this journal, passed away in Tokyo on June 14, 1990.

He was born in Sendai on July 2, 1904. He graduated from Tôhoku Imperial University in March, 1927 receiving the degree of Bachelor of Science in Mathematics. He was appointed to lecturer in Mathematics at Tôhoku Imperial University in 1928, promoted to assistant professor in 1934 and to full professor in 1942. In the mean time, Tôhoku Imperial University conferred on him in 1938 the degree of Doctor of Science in Mathematics. In 1942 he resigned as professor of Tôhoku Imperial University. Since then he served as professor of Tokyo Metropolitan University from 1950 to 1956, professor of Hokkaido University from 1956 to 1961 and professor of Nihon University from 1961 to 1965. He was a visiting professor at Academia Sinica and Tsing-Hua University in Taiwan from 1965 to 1966. He was a senior research fellow at the Australian National University from 1966 to 1969, a visiting fellow from 1969 to 1971 and honorable fellow of the Institute of Advanced Studies of the above university from 1971 to 1982.

He visited the University of Chicago and Princeton University as exchange professor under Fulbright fellowship from 1957 to 1959, and Montpellier University from 1960 to 1961.

From 1982 on he stayed in Tokyo.

Throughout his mathematical career he was interested in analytic number theory and topics related to it. He worked and published many papers on Fourier series, Fourier integrals, theory of integrals, in particular Denjoy integral, central limit theorems and so on.

Some of the papers in Japanese are not included in the list of publications below.

Tamotsu Tsuchikura

List of publications of Shin-ichi Izumi

- [1] Einige Bemerkungen zur verallgemeinerten Schwarzschen Ungleichung, Tôhoku Math. J. 27 (1926), 126–131.
- [2] Über die lineare Transformation in der Theorie der unendlichen Reihen, Tôhoku Math. J. 27 (1926), 313–323; Berichtigung, Tôhoku Math. J. 28 (1928), 113.
- [3] Einiges über die Differenzoperation in der Theorie der unendlichen Reihen, Tôhoku Math. J. 27 (1926), 324–331.

- [4] On the expansion of analytic function, Tôhoku Math. J. 28 (1927), 97–106.
- [5] On the system of linear equations with infinitely many unknowns, Tôhoku Math. J. 28 (1927), 107–113.
- [6] On transcendental numbers, Proc. Imperial Acad. of Japan 3 (1927), 390–391.
- [7] On a generalization of the Titchmarsh's reciprocal formula, Japanese J. of Math. 4 (1927), 1–6.
- [8] Über Gauss-Fabersche Ungleichung für Integrale, Japanese J. of Math. 4 (1927), 7–10.
- [9] On the distribution of the zero points of sections of a power series, Japanese J. of Math. 4 (1927), 29–32.
- [10] A remark on singular points of an analytic function on its convergence circle, Japanese J. of Math. 4 (1927), 121–123.
- [11] Eine Bemerkung über asymptotische Entwicklung von Funktionen, Japanese J. of Math. 4 (1927), 141–145.
- [12] A theorem concerning the zero points of the sections of a power series, Japanese J. of Math. 4 (1927), 251–252.
- [13] On transcendental numbers, Tôhoku Math. J. 29 (1928), 250–253.
- [14] Remarks on the Fourier's inversion formulas, Tôhoku Math. J. 29 (1928), 268–277.
- [15] On the singularity of the functions defined by Dirichlet's series, Proc. Imperial Acad. of Japan 4 (1928), 513–516.
- [16] A generalization of almost periodic functions, Proc. Imperial Acad. of Japan 4 (1928), 586–589.
- [17] Über die ganzwertige ganze Funktion, Japanese J. of Math. 5 (1928), 5–22.
- [18] Über die Gültigkeitsbedingung der Interpolationsformeln, Japanese J. of Math. 5 (1928), 23–28.
- [19] On the series of interpolation, Japanese J. of Math. 5 (1928), 135–142.
- [20] On the representation of functions by the formula of interpolation, Japanese J. of Math. 5 (1928), 143–146.
- [21] On the theory of the linear functional differential equations, Tôhoku Math. J. 30 (1929), 10–18.
- [22] Über die Summierbarkeit der Fourierschen Integralformel, Tôhoku Math. J. 30 (1929), 96–110.
- [23] On the Cahen-Mellin's inversion formula, Tôhoku Math. J. 30 (1929), 111–114.
- [24] Analytic function with assigned value at the given point set, Tôhoku Math. J. 30 (1929), 182–184.
- [25] A theorem on Dirichlet's series, Tôhoku Math. J. 30 (1929), 445–449.
- [26] A theorem on the summability of the derived Fourier series, Tôhoku Math. J. 31 (1929), 68–71.

- [27] On the summability of the conjugate Fourier series, Tôhoku Math. J. 31 (1929), 109–113.
- [28] A generalization of Tauber's theorem, Proc. Imperial Acad. of Japan 5 (1929), 57–59.
- [29] On Hankel transforms, Proc. Imperial Acad. of Japan 5 (1929), 113–115.
- [30] Über die Gültigkeitsbedingung der Interpolationsformeln, II, Japanese J. of Math. 6 (1929), 77–79.
- [31] Integral functions defined by Dirichlet's series, Japanese J. of Math. 6 (1929), 199–204.
- [32] A generalization of Tauber's theorem, Japanese J. of Math. 6 (1929), 235–243.
- [33] Integration of conjugate functions, Japanese J. of Math. 6 (1929), 333–337.
- [34] Hankel transforms, Tôhoku Math. J. 32 (1930), 54–58.
- [35] Some inequalities in the theory of functions of a complex variable, Tôhoku Math. J. 32 (1930), 303–305.
- [36] On the mean convergence, Japanese J. of Math. 7 (1930), 27–35.
- [37] Interpolation series and integral functions, Japanese J. of Math. 8 (1931), 1–12.
- [38] Differential equations of infinite order (I), Proc. of Physico-Math. Soc. of Japan 4 (1930–1), 160–173 (in Japanese).
- [39] Differential equations of infinite order (II), Proc. of Physico-Math. Soc. of Japan 4 (1930–1), 259–274 (in Japanese).
- [40] On the condition for the convergency of the series summable (C, r) , Tôhoku Math. J. 33 (1931), 117–126.
- [41] The magnitude of the derivative of a function, Tôhoku Math. J. 33 (1931), 127–129.
- [42] Analytic function with assigned boundary value, Tôhoku Math. J. 33 (1931), 130–139.
- [43] A theorem on limits and its application, Tôhoku Math. J. 33 (1931), 181–186.
- [44] The derivatives and approximate derivatives, Tôhoku Math. J. 37 (1933), 241–247; Correction in Tôhoku Math. J. 39 (1934), 180–186.
- [45] A new concept of integrals, Proc. Imperial Acad. of Japan 9 (1933), 570–573.
- [46] A new concept of integrals, II, Proc. Imperial Acad. of Japan 10 (1934), 57–58.
- [47] A new proof of the Andersen's theorem, Proc. Imperial Acad. of Japan 10 (1934), 140–142.
- [48] On the Wiener's formula, Proc. Imperial Acad. of Japan 10 (1934), 393–396.
- [49] Infinite series with multiply monotone terms, Proc. Physico-Math. Soc. 16 (1934), 127–131.
- [50] (with D. Ito) On multiply monotone sequences, Proc. Physico-Math. Soc. 16

- (1934), 132–136.
- [51] (with G. Sunouchi) On Cesàro's theorem, Proc. Physico-Math. Soc. 16 (1934), 297–302.

- [197] (with M. Izumi) Integrability of trigonometric series II, *Pacific J. Math.* 42 (1972), 359–367.
- [198] (with M. Izumi) Formal multiplication of trigonometric series, *J. Austral. Math. Soc.* 16 (1973), 70–77.
- [199] (with M. Izumi) Divergence of Fourier series, *Bull. Austral. Math. Soc.* 8 (1973), 289–304; Corrigenda, *Bull. Austral. Math. Soc.* 9 (1973), 319–320; Corrigenda II, *Bull. Austral. Math. Soc.* 10 (1974), 152–160.
- [200] (with M. Izumi) Uniform convergence and everywhere convergence of Fourier series I, *Bull. Austral. Math. Soc.* 9 (1973), 321–335.
- [201] (with M. Izumi) Uniform convergence and everywhere convergence of Fourier series II, *Bull. Austral. Math. Soc.* 9 (1973), 337–342.
- [202] (with M. Izumi) On the Riemann zeta-function I, *Bull. Austral. Math. Soc.* 15 (1976), 161–211.
- [203] Some topics on the summability and absolute summability of Fourier series, *Séminaire d'Analyse Moderne*, No. 8, Département de Mathématiques, Université de Sherbrooke, Sherbrooke, Que., 1971, iii + 103pp.

List of monographs in Japanese (incomplete)

- [1] Dirichlet Series, Iwanami-shoten, 1931.
- [2] Method of Constant Differences, Iwanami-shoten 1935.
- [3] Theory of Integrals, Iwanami-shoten 1937.
- [4] Theory of Real Analysis, Jibundo, 1947.
- [5] Theory of Series, Nihonhyoron-sha, 1948.
- [6] Introduction to Fourier Analysis, Kyoritsu-shuppan, 1951.
