

Acknowledgements

The Symposium was sponsored by the Institute of Mathematical Statistics and the Hong Kong Baptist College. Invited speakers, young participants, Chinese participants and Southeast Asian participants were supported through donations received from the following organizations:

American International Assurance Co. Ltd.
Beijing-Hong Kong Academic Exchange Centre
Chekiang First Bank Ltd.
Croucher Foundation
Epson Foundation
SAS Institute Inc.
Wei Lun Foundation
K. C. Wong Foundation
United Nations Educational, Scientific and Cultural Organization

In addition the U.S. National Science Foundation provided a grant to the Institute of Mathematical Statistics for 25 participants of whom eight were post doctoral students and two were graduate students. We are grateful for the assistance of all these organizations; the Symposium could not have been held without their support.

The International Program Committee was responsible for drafting the list of invited speakers and advising on matters related to the academic content of the Symposium. The members of the Committee were:

John Aitchison, University of Virginia
T. W. Anderson, Stanford University
Kai-Tai Fang, Hong Kong Baptist College and Academia Sinica
Seymour Geisser, University of Minnesota
Alan T. James, University of Adelaide
Ingram Olkin, Stanford University
Kei Takeuchi, Tokyo University

The opportunity to host an international symposium on multivariate analysis was enthusiastically received by the Hong Kong statistical community.

The Hong Kong Statistical Society showed its support by nominating its President to serve on the Local Organizing Committee, which also included academics from all local tertiary institutions and senior government statisticians. The members of the Local Organizing Committee were:

N.N. Chan, The Chinese University of Hong Kong (Vice-Chairman)
Stephen L. Chan, Hong Kong Baptist College (Secretary and Treasurer)
Kai-Tai Fang, Hong Kong Baptist College and Academia Sinica (Chairman)
Fred J. Hickernell, Hong Kong Baptist College (Vice-Chairman)
Frederick W.H. Ho, Census and Statistics Department of Hong Kong
K.Y. Li, Hong Kong Polytechnic
C.F. Ng, Hong Kong Baptist College (Advisor)
H.K. Yip, Census and Statistics Department of Hong Kong
Allanus H.M. Tsoi, The Hong Kong University of Science and Technology

The smooth running of the Symposium was done in great part to the hard work of the Local Organizing Committee. Prof. C.F. Ng in his role as advisor helped to secure substantial financial support for the Symposium. Thanks are also due to the administration, faculty, and students at the Hong Kong Baptist College for their help with a myriad of details.

We are grateful to to Dr. Robert Serfling and the Institute of Mathematical Statistics for publishing this volume. Finally, we thank Ms. Y. Jin, Miss Catherine S.K. Shum, Miss Betty Y.F. Sun and Miss Yoko S.H. Wong for their excellent clerical and technical support in preparing this Proceedings.
