Preface

	Preface	vii
	Contents	viii
1.	Introductory expositions on projective representation o	f
	groups,  T. Hirai, A. Hora and E	
0.	Introduction	1
1.	How projective representations appear naturally	2
2.	Pauli's spin quantum number and Dirac's equation	9
3.	Sources where projective representations occur (1)	18
	Sources where projective representations occur (2)	23
	Weil representations of symplectic groups	26
6.	Hidden symmetries in the algebra $M(2^k, \mathbb{C})$	35
	References	45
2.	Projective representations and spin characters of complereflection groups $G(m, p, n)$ and $G(m, p, \infty)$ , I,	
	T. Hirai, E. Hirai and A	. Hora
Λ	T. Hirai, E. Hirai and A. Introduction	
_	Introduction	49
Pa	Introduction art I General theory for complex reflection groups	49 54
Pa 1.	Introduction  art I General theory for complex reflection groups  Projective representations and representation groups	<b>49 54</b>
Pa 1. 2.	Introduction  art I General theory for complex reflection groups  Projective representations and representation groups  Wreath product groups and complex reflection groups	<b>49 54</b> 54 57
Pa 1. 2. 3.	Introduction  art I General theory for complex reflection groups  Projective representations and representation groups  Wreath product groups and complex reflection groups  Representation groups of complex reflection groups	49 54 54 57 58
Pa 1. 2. 3. 4.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m, 1, n))$ corresponding to $G(m, p, n)$	49 54 54 57 58 63
Pa 1. 2. 3. 4. 5.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$	49 54 54 57 58 63 65
Pa 1. 2. 3. 4. 5. 6.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$ General aspects about characters of groups	49 54 57 58 63 65 66
Pa 1. 2. 3. 4. 5. 6. 7.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$ General aspects about characters of groups Conjugation in $R(G(m,p,n))$ modulo $Z$	49 54 54 57 58 63 65
Pa 1. 2. 3. 4. 5. 6. 7. 8.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$ General aspects about characters of groups	49 54 57 58 63 65 66 71
Pa 1. 2. 3. 4. 5. 6. 7. 8. 9.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$ General aspects about characters of groups Conjugation in $R(G(m,p,n))$ modulo $Z$ Supports of spin characters of $G(m,1,n)$ ( $m$ odd)	49 54 57 58 63 65 66 71 77
Pa 1. 2. 3. 4. 5. 6. 7. 8. 9. 10.	Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$ General aspects about characters of groups Conjugation in $R(G(m,p,n))$ modulo $Z$ Supports of spin characters of $G(m,1,n)$ ( $m$ odd) Supports of spin characters of $G(m,1,n)$ ( $m$ even) Supports of spin characters of infinite generalized symmetric groups $G(m,1,\infty)$	49 54 57 58 63 65 66 71 77

Introduction art I General theory for complex reflection groups Projective representations and representation groups Wreath product groups and complex reflection groups Representation groups of complex reflection groups Normal subgroups of $R(G(m,1,n))$ corresponding to $G(m,p,n)$ Infinite version $R(G(m,1,\infty))$ and $R(G(m,p,\infty))$ General aspects about characters of groups Conjugation in $R(G(m,p,n))$ modulo $Z$ Supports of spin characters of $G(m,1,n)$ ( $m$ odd) Supports of spin characters of $G(m,1,n)$ ( $m$ even) Supports of spin characters of infinite generalized symmetric groups $G(m,1,\infty)$ Factorisability for spin characters of $G(m,1,\infty)$	49 54 54 57 58 63 65 66 71 77 79 82 85

Pa	rt II Detailed study in Case VII	97
15.	Explicit formula for characters of $G(m, p, \infty)$ in Case VIII	97
	Formula for spin characters of $G(m, 1, \infty)$ in Case VII	98
17.	Projective IRs of $G(m, 1, n)$ in Case VII	102
18.	Irreducible spin characters of $G(m, 1, n), m$ even, Case VII,	
10	Type $(1, 1, -1)$	114
19.	Limits of irreducible spin characters of $G(m, 1, n)$ as $n \to \infty$ ,	110
20	in Case VII Appendix. Proof of Lemma 18.2	118 120
20.	List of Definitions and Symbols	120 122
0		
3.	Projective representations and spin characters of complex reflection groups $G(m, p, n)$ and $G(m, p, \infty)$ , II,	X
	Case of generalized symmetric groups, T. Hirai, A. Hora and E. I	Hirai
0.	Introduction	123
Pa	art I Preparatory results	126
1.	Generality for projective representations	126
	G(m, p, n) and their representation groups	132
3.	Method of our study in this paper	138
4.	Spin characters of $G(m, 1, n)$ and $G(m, 1, \infty)$	140
Pa	art II Spin irreducible representations of $R(G(m, 1, n))$ ,	
	$n < \infty$ , of Types $(-1, -1, -1)$ and $(-1, -1, 1)$	143
5.	Covering group $\widetilde{D}(m,n)$ and Clifford algebra	143
6.	Spin IRs of $\widetilde{D}_n := \widetilde{D}(m,n)$	150
7.	Actions of $\widetilde{\mathfrak{S}}_n$ on $\widetilde{D}_n$ and stationary subgroups for equivalence classes	
	of IRs	155
8.	Intertwining operators for IRs of $\widetilde{D}_n$ , related spin representations of	150
0	$\mathfrak{S}_n$ and $\mathfrak{A}_n$ Intertwining relations among $P$ 's under $\widetilde{\mathfrak{S}}_n$ in CASE I	158
	Intertwining relations among $P_{\gamma}$ 's under $\widetilde{\mathfrak{S}}_n$ in CASE I	164
	Intertwining relations among $P_{\gamma}$ 's under $\mathfrak{S}_n$ in CASE II Classification of spin IRs of $G(m, 1, n)$ , CASE I, Type $(-1, -1, -1)$	166 169
	Classification of spin IRs of $G(m, 1, n)$ , CASE II, Type $(-1, -1, 1)$	174
		111
Pa	art III Spin irreducible characters of $R(G(m, 1, n))$ of	
	Type $(-1, -1, \pm 1)$	181
13.	Conjugacies in $\mathfrak{S}_n$ and $\mathfrak{A}_n$ , and in $\widetilde{\mathfrak{S}}_n$ and $\widetilde{\mathfrak{A}}_n$	181
	Characters of spin representations of $\mathfrak{S}_n$ and $\mathfrak{A}_n$	184
15.	Relations to Hauptdarstellung of Schur	189

Contents

16. Characters of IRs of $\widetilde{D}_n \stackrel{\mathrm{I}}{\rtimes} \mathcal{S}(P_\gamma), \ \widetilde{D}_n \stackrel{\mathrm{I}}{\rtimes} \mathcal{S}(P_\gamma^{\pm})$	192		
'	192		
17. Characters of IRs of $\widetilde{D}_n \stackrel{\text{II}}{\rtimes} \mathcal{S}(P_\gamma), \ \widetilde{D}_n \stackrel{\text{II}}{\rtimes} \mathcal{S}(P_\gamma^{\pm})$	209		
18. Factorisability of characters and covariance of trace functions	223		
19. Characters of spin IRs of $\widetilde{G}_n^{\mathrm{I}}$ (CASE I)	228		
20. Characters of spin IRs of $\widetilde{G}_n^{\rm II}$ (CASE II)	235		
Part IV Spin characters of infinite group $R(G(m, 1, \infty))$			
of Types $(-1, -1, \pm 1)$	246		
21. Towards limits of spin irreducible characters	246		
22. Limits of special spin irreducible characters	249		
23. Limits of spin irreducible characters	253		
24. Determination of spin characters of $G(m, 1, \infty)$	259		
25. Structure of the space of spin characters of $G(m, 1, \infty)$	264
