

# The Annals of Statistics

Vol. 21

March 1993

No. 1

- Nonexistence of informative unbiased estimators in singular problems  
RICHARD C. LIU AND LAWRENCE D. BROWN
- Hellinger-consistency of certain nonparametric maximum likelihood estimators  
SARA VAN DE GEER
- Asymptotically optimal tests for conditional distributions . . . . M. FALK AND F. MAROHN
- Differentiability of statistical functionals and consistency of the jackknife . . . . JUN SHAO
- A large sample study of rank estimation for censored regression data . . . ZHILIANG YING
- A Bayesian bootstrap for censored data . . . . . ALBERT Y. LO
- Nonparametric estimation in the Cox model . . . . . FINBARR O'SULLIVAN
- Almost sure representations of the product-limit estimator for truncated data  
WINFRIED STUTE
- Optimal smoothing in single-index models  
WOLFGANG HÄRDLE, PETER HALL AND HIDEHIKO ICHIMURA
- A new class of kernels for nonparametric curve estimation K. MESSER AND L. GOLDSTEIN
- Local linear regression smoothers and their minimax efficiencies . . . . . JIANQING FAN
- Smoothing spline density estimation: Theory . . . . . CHONG GU AND CHUNFU QIU
- Testing for additivity of a regression function . . . . . DANIEL BARRY
- Bootstrap and wild bootstrap for high dimensional linear models . . . . . E. MAMMEN
- Balanced importance resampling for the bootstrap  
JAMES G. BOOTH, PETER HALL AND ANDREW T. A. WOOD
- Model selection via multifold cross validation . . . . . PING ZHANG
- Lower bounds for contamination bias: Globally minimax  
versus locally linear estimation . . . . . XUMING HE AND DOUGLAS G. SIMPSON
- Efficiency-constrained bias-robust estimation of location  
R. DOUGLAS MARTIN AND RUBEN H. ZAMAR
- Invariants of some probability models used in phylogenetic inference  
STEVEN N. EVANS AND T. P. SPEED
- Admissibility results in loss estimation . . . . . CHITRA LELE
- On reaching a consensus using DeGroot's iterative pooling  
GUSTAVO L. GILARDONI AND MURRAY K. CLAYTON
- $E$ -optimal designs for polynomial regression  
FRIEDRICH PUKELSHEIM AND WILLIAM J. STUDDEN
- Geometry of  $E$ -optimality . . . . . HOLGER DETTE AND WILLIAM J. STUDDEN
- Minimax regression designs under uniform departure models . . . . . DEI-IN TANG
- Using prior information in designing intervention detection experiments  
PETER SCHUMACHER AND JAMES V. ZIDEK
- A sequential clinical trial for comparing three treatments . . . . . D. SIEGMUND
- Sequential estimation results for a two-parameter exponential family  
of distributions . . . . . ARUP BOSE AND BENZION BOUKAI
- Asymptotic expansions for the moments of a randomly stopped average  
GIRISH ARAS AND MICHAEL WOODROOFE
- Consistency and limiting distribution of the least squares estimator  
of a threshold autoregressive model (consistency and limiting distribution)  
K. S. CHAN
- $R$ -estimation of the parameters of autoregressive  $[AR(p)]$  models  
HIRA L. KOUL AND A. K. MD. E. SALEH
- The effect of serial correlation on tests for parameter change at unknown time  
S. M. TANG AND I. B. MACNEILL

# The Annals of Probability

No. 2

## Memorial Articles

Frank Spitzer 1926–1992

- Frank Spitzer's pioneering work on interacting particle systems . . . . .DAVID GRIFFEATH  
Frank Spitzer's work on random walk and Brownian motion . . . . .HARRY KESTEN  
Publications of Frank Spitzer . . . . .

## Articles

- Convergence rate of expected spectral distributions of large-dimensional  
random matrices. Part I. Wigner matrices . . . . .Z. D. BAI  
Convergence rate of expected spectral distributions of large-dimensional  
random matrices. Part II. Sample covariance matrices . . . . .Z. D. BAI  
Gaussian estimates for Markov chains and random walks on groups  
W. HEBISCH AND L. SALOFF-COSTE  
Random processes of the form  $X_{n+1} = a_n X_n + b_n \pmod{p}$  . . . . .MARTIN HILDEBRAND  
 $I$ -projection and conditional limit theorems for discrete parameter  
Markov processes . . . . .CAROLYN SCHROEDER  
Strong approximation for set-indexed partial sum processes,  
via K.M.T. constructions I . . . . .EMMANUEL RIO  
Refinements in asymptotic expansions for sums of weakly dependent  
random vectors . . . . .SOUMENDRA NATH LAHIRI  
Asymptotic expansions for martingales . . . . .PER ASLAK MYKLAND  
An asymptotic independent representation in limit theorems  
for maxima of nonstationary random sequences . . . . .ADAM JAKUBOWSKI  
A nonstandard law of the iterated logarithm for trimmed sums . . . . .ERICH HAEUSLER  
Borel stochastic games with lim sup payoff . . . . .A. MAITRA AND W. SUDDERTH  
Supports of certain infinitely divisible probability measures  
on locally convex spaces . . . . .BALRAM S. RAJPUT  
The infinite secretary problem with recall . . . . .AMY L. ROCHA  
Almost sure bootstrap of the mean under random normalization . . . . .STEVEN J. SEPANSKI  
Characteristic exponents for two-dimensional bootstrap percolation . . . . .ENRIQUE D. ANDJEL  
Central limit theorem for a random walk with random obstacles  
in  $R^d$  . . . . .HIDEKI TANEMURA  
Girsanov transform for symmetric diffusions with infinite dimensional  
state space . . . . .S. ALBEVERIO, M. RÖCKNER AND T. S. ZHANG  
Some limit theorems for super-Brownian motion and  
semilinear differential equations . . . . .TZONG-YOW LEE  
Weak convergence for reversible random walks  
in a random environment . . . . .DANIEL BOIVIN  
Distributions of subadditive functionals of sample paths  
of infinitely divisible processes . . . . .JAN ROSINSKI AND GENNADY SAMORODNITSKY  
Large deviations for Markov processes corresponding  
to PDE systems . . . . .ALEXANDER EIZENBERG AND MARK FREIDLIN  
An inversion of Strassen's law of the iterated logarithm for small time . . . . .NINA GANTERT  
Existence and continuity of occupation densities of stochastic  
integral processes . . . . .PETER IMKELLER  
Intersection local times of all orders for Brownian and stable density  
processes—construction, renormalisation and limit laws  
ROBERT J. ADLER AND JAY S. ROSEN  
Recurrent perturbations of certain transient radially symmetric diffusions . . . . .D. IOFFE  
Wald's equations for a class of denormalized  $U$ -statistics  
Y. S. CHOW, V. H. DE LA PEÑA AND H. TEICHER  
Asymptotic distributions of weighted  $U$ -statistics of degree 2  
KEVIN A. O'NEIL AND RICHARD A. REDNER  
Weak convergence and Glivenko–Cantelli results for weighted empirical  
 $U$ -processes . . . . .WILHELM SCHNEEMEIER
