STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

Annual Subscription	£7. 10s. (U.S.A. $24.00)
Single Number	£2. 5s. (U.S.A. $ 7.00)
Loose Leaf Binders for Single Abstract Sheets	16s. 3d including postage and packing.

REVIEW OF THE INTERNATIONAL STATISTICAL INSTITUTE

Contents of Vol. 37, No. 3

Articles

McCarthy, P. L.—Pseudo-replication: half samples
Martin-Löf, P.—Algorithms and randomness
Thorp, E. O.—Optimal gambling systems for favorable games
Mahajan, B. M.—On some aspects of unadjusted and adjusted R^2 estimated from Indian consumption data

Communications

Statistical organization and administration
Statistical training and research
Statistical societies

Calendar of meetings
Book Reviews

The REVIEW OF THE ISI is published three times per year. The annual subscription is $11.50 post free.
Orders should be sent to: *International Statistical Institute, 2, Oostduinlaan, The Hague, Netherlands.*

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.*

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Wassily Hoeffding, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514

President-Elect:

Jack C. Kiefer, Department of Mathematics, Cornell University, Ithaca, New York 14850

Executive Secretary:

Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

Program Secretary:

R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

Managing Editor:

K. J. C. Smith, Department of Statistics University of North Carolina, Chapel Hill, North Carolina 27514

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are $20.00 per year for residents of the United States or Canada and $12.00 per year for residents of other countries. Special student rates of $10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics* and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

On the asymptotic distribution of a certain functional of the Wiener process
A. D. WYNER 1409

A general theory of subjective probabilities and expected utilities
PETER C. FISHBURN 1419

Quadratic forms and idempotent matrices with random elements
F. A. GRAYBILL AND GEORGE MILLIKEN 1430

Distribution of a product and the structural setup of densities
R. K. SAXENA AND A. M. MATHAI 1439

The Smirnov two sample tests as rank tests ..... G. P. STECK 1449

A stable limit theorem for Markov tests ..... STEPHEN R. KIMBLETON 1467

Notes

Note on a theorem of Dynkin on the dimension of sufficient statistics
J. L. DENNY 1474

Smoothing by cheating ..... JAMES M. DICKEY 1477

Inadmissibility of the best invariant test when the moment is infinite under one of the hypotheses ..... MARTIN FOX AND S. K. PERNG 1483

Some distribution-free multivariate comparison procedures ..... RYOJI TAMURA 1486

Strong consistency of certain sequential estimators ..... ROBERT H. BERK 1492

Density estimation by orthogonal series ..... GEOFFREY S. WATSON 1496

Uniform consistency of some estimates of a density function
DAVID S. MOORE AND E. G. HENRICHON 1499

Zeroes of infinitely divisible densities ..... MICHAEL J. SHARPE 1503

Bounds on moments of sums of random variables
KUMAR JOGDEO AND S. W. DHARMADHIKARI 1506

Correction Notes

Correction to "A central limit theorem for the number of edges in the random intersection of two graphs" ..... O. ABE 1510

Correction to abstract "A generalized estimator for the mean of a finite population using multi-auxiliary information" ..... SURENDRA K. SRIVASTAVA 1510

Abstracts 1511

News and Notices 1519

Publications Received 1520

MEETINGS OF THE INSTITUTE

ANNUAL MEETING—New York, New York, August 19–22, 1969
Laramie, Wyoming, late August, 1970
EASTERN REGIONAL—Chapel Hill, North Carolina, Spring, 1970
CENTRAL REGIONAL—Dallas, Texas, Spring, 1970

Abstracts should be submitted in duplicate to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514, **on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.**
