

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
On Bahadur's representation of sample quantiles.....	J. KIEFER 1323
Lower bounds for average sample number of sequential multihypothesis tests	
	GORDON SIMONS 1343
A sequential three hypothesis test for determining the mean of a normal population with known variance.....	GORDON SIMONS 1365
A class of sequential procedures for choosing one of $K$ hypotheses concerning the un- known drift parameter of the Wiener process.....	GORDON SIMONS 1376
A sequential analogue of the Behrens-Fisher problem	
	H. ROBBINS, G. SIMONS AND NORMAN STARR 1384
Finding the size of a finite population.....	D. A. DARLING AND H. ROBBINS 1392
Integrated risk of asymptotically Bayes sequential tests.....	GARY LORDEN 1399
A Bayesian study of the multinomial distribution	
	DANIEL A. BLOCH AND GEOFFREY S. WATSON 1423
A special structure and equivariant estimation.....	ROBERT H. BERK 1436
On estimation of the mode.....	J. H. VENTER 1446
Data transformations and the linear model.....	D. A. S. FRASER 1456
Association random variables, with applications	
	J. D. ESARY, F. PROSCHAN AND D. W. WALKUP 1466
Exact Bahadur efficiencies for the Kolmogorov-Smirnov and Kuiper one- and two- sample statistics.....	INNIS G. ABRAHAMSON 1475
On exact probabilities of rank orders for two widely separated normal distributions	
	ROY C. MILTON 1491
Testing hypotheses in randomized factorial experiments	
	S. EHRENFELD AND S. ZACKS 1494
Estimability of variance components for the two-way classification with iteration	
	DAVID A. HARVILLE 1508
On two $K$ -sample rank tests for censored data.....	A. P. BASU 1520
An approach to simultaneous tolerance intervals in regression.....	A. L. WILSON 1536
Probability tables for the extremal quotient	
	E. J. GUMBEL AND JAMES PICKANDS, III 1541
A theorem of Lévy and a peculiar semigroup.....	DAVID A. FREEDMAN 1552
The maximum deviation of sample spectral densities	
	MICHAEL B. WOODROOFE AND JOHN W. VAN NESS 1558

*Continued on back cover*

---

Vol. 38, No. 5—October 1967

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$30 per volume (six issues of one calendar year) in the U. S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$15 per volume, \$4.00 per issue; issues from 1957 through 1964 are \$20.00 per volume, \$5.25 per issue; from 1965 onward, \$30 per volume, \$5.25 per issue. Complete sets (Volumes I-XXVII) are \$250. If additional volumes are ordered at the same time the set is ordered, the price is \$15 for each additional volume. An index to Volumes I-XXXI is available for \$10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. Abstracts and corrected galley proofs should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

**Preparation of manuscripts.** Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\overline{\log x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ , and  $ab/cd$  rather than  $\frac{ab}{cd}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202
