# STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

<i>Annual Subscription</i>	£5 (U. S. A. \$16.00)
<i>Single Number</i>	30s (U. S. A. \$4.50)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	6s.3d including postage and packing.

## JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in two series, SERIES A (GENERAL), four issues a year, annual subscription, post free, £5 4s. U. S. \$15: price each part 30s: SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free, £4 2. U. S. \$12: price each part 35s.

Reviews; Current Notes; Library Accessions

### Contents of SERIES B (METHODOLOGICAL), VOL. 26, PART 2, 1964

- Bayesian tolerance regions J. AITCHISON  
Relationships between Bayesian and confidence limits for predictions A. R. THATCHER  
Discussion on the two papers  
An analysis of transformations (with Discussion) G. E. P. BOX AND D. R. COX  
On local inference and information D. A. S. FRASER  
The linear hypothesis and idempotent matrices G. A. F. SEBER  
Note on interval estimation in non-linear regression when responses are correlated MAX HALPERIN  
A note on the Bartlett decomposition of a Wishart matrix D. G. KABE  
Comments on a posterior distribution of Geisser and Cornfield M. STONE  
On the Bayesian estimation of multivariate regression GEORGE C. TIAO AND ARNOLD ZELLNER  
Characterization theorems for some univariate probability distributions G. P. PATIL AND V. SESHADRI  
On the power of two-sample rank tests on the equality of two distribution functions JEAN D. GIBBONS  
A proposed two-sample rank test: the Psi test and its properties JEAN D. GIBBONS  
The detection of partial association, I: The 2 x 2 case M. W. BIRCH  
Some properties of counts of events for certain types of point process T. LEWIS AND L. J. GOVIER  
A note on the solution of dam equations E. H. LLOYD AND S. ODOOM  
A model for rainfall occurrence J. R. GREEN  
Spectral analysis in the presence of variance fluctuations L. J. HERBST  
Stationary amplitude fluctuations in a random sample L. J. HERBST  
Corrigenda: Congestion systems with incomplete service F. DOWNTON

LETTERS TO THE EDITOR, NOTICES

ERRATA

The purpose of TECHNOMETRICS is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

## SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 26, PART 1, 1964

Jawaharlal Nehru 1889-1964

Recovery of ancillary information .....	D. Basu
Classification between univariate exponential populations .....	P. K. Bhattacharyya and S. Das Gupta
Non-parametric classification rules .....	Somesh Das Gupta
A generalisation of a stochastic method considered by V. M. Dandekar .....	S. W. Dharmadhikari
Further results on classification by $W$ .....	S. John
Methods for evaluation of probabilities of polygonal and angular regions when the distribution is bivariate $t$ .....	S. John
Some remarks on truncation and admissibility in exponential families .....	B. K. Kale
On the existence of trees with given degrees .....	V. V. Menon
Product method of estimation .....	M. N. Murthy
On estimating the size of a population and its inverse by capture mark method .....	P. K. Pathak
An approximation to the non-central chi-square distribution .....	J. Roy and Jan Mohamad
On the comparison between simple random sampling with and without replacement. G. R. Seth and J. N. K. Rao	
On a local property of combined inter- and intra-block estimators .....	K. R. Shah
A note on the non-existence of symmetric balanced incomplete block designs .....	S. S. Shrikhande and D. Raghavarao
Existence of unbiased estimates .....	Rajinder Singh
A note on two-stage sampling on successive occasions .....	B. D. Tikkiwal
Hazard analysis II .....	G. S. Watson and M. R. Leadbetter

The subscription price per volume for each of the series separately is: Outside India: \$20.00; £7. In India: Rs. 30.00. The subscription price per volume for both the series taken together is: Outside India: \$30.00; £10. In India: Rs. 50.00.

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd.,  
Headington Hill Hall,  
Oxford, England

or

Pergamon Press Inc.,  
122 East 55th Street,  
New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,  
204/1 Barrackpore Trunk Road,  
Calcutta-35, India

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

## OFFICERS

### *President:*

Herbert Solomon, Department of Statistics, Stanford University, Stanford, California.

### *President-Elect:*

Herbert E. Robbins, Department of Mathematical Statistics, Columbia University, New York 27, N.Y.

### *Executive Secretary:*

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

### *Program Secretary:*

Dorothy Gilford, Office of Naval Research, Washington 25, D.C.

### *Treasurer:*

George J. Resnikoff, Department of Statistics, California State College, Hayward, California.

### *Editor:*

D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$15.00 per year for residents of the United States or Canada and \$7.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

## Contents (Continued)

A Uniqueness Theorem for Stationary Measures of Ergodic Markov Processes	RICHARD ISAAC 1781
On Qualitative Probability $\sigma$ -Algebras	C. VILLEGAS 1787
Eigenvalues of Non-Negative Matrices	WILLIAM E. PRUITT 1797
<b>NOTES</b>	
Distribution of the "Generalised" Multiple Correlation Matrix in the Dual Case	C. G. KHATRI 1801
Distribution of the Largest or the Smallest Characteristic Root Under Null Hypothesis Concerning Complex Multivariate Normal Populations	C. G. KHATRI 1807
A Note on Convergence of Sub-Martingales	DAN CHAZAN 1811
Some Results on the Order Statistics of the Multivariate Normal and Pareto Type 1 Populations	K. V. MARDIA 1815
Convergence Properties of a Learning Algorithm	LEO BREIMAN AND ZIVIA S. WURTELE 1819
A Note on the Poisson Tendency in Traffic Distribution	TORBJÖRN THÉDEEN 1823
Note on Mood's Test	C. F. CROUSE 1825
Correction Note	1827
Book Reviews	L. K. SCHMETTERER, B. GNEDENKO 1828
Abstracts of Papers	1834
News and Notices	1853
Report of the President for 1964	1864
Report of the Treasurer for 1964	1865
Report of the Editor for 1964	1870
Report of the Amherst, Massachusetts, Meeting	1872
Report of the Berne, Switzerland, Meeting	1877

# MEETINGS OF THE INSTITUTE

## TENTATIVE SCHEDULE

**CENTRAL REGIONAL—Chicago, Illinois—December 28–29, 1964.**

**EASTERN REGIONAL—Tallahassee, Florida—Spring, 1965.**

**CENTRAL REGIONAL—Lincoln, Nebraska—Spring, 1965.**

**WESTERN REGIONAL—Berkeley, California—Summer, 1965.**

**ANNUAL MEETING—Philadelphia, Pennsylvania—September, 1965.**

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
