THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930–1938

EDITED BY S. S. WILKS, 1938–1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

	PAGE
On Mixed Single Sample Experiments ... LEONARD COHEN	947
Asymptotic Normality and Efficiency of Certain Nonparametric Test Statistics ... HERMAN CHERNOFF AND I. RICHARD SAVAGE	972
A High Dimensional Two Sample Significance Test ... A. P. DEMPSTER	995
On the Kolmogorov and Smirnov Limit Theorems for Discontinuous Distribution Functions ... PAUL SCHMID	1011
Incomplete Sufficient Statistics and Similar Tests ... ROBERT A. WIJSMAN	1028
A Method of Generating Best Asymptotically Normal Estimates with Application to the Estimation of Bacterial Densities ... THOMAS FERGUSON	1046
Families of Designs for Two Successive Experiments ... G. H. FREEMAN	1063
Most Economical Multiple-Decision Rules ... WM. JACKSON HALL	1079
Estimation of the Means of Dependent Variables ... OLIVE JEAN DUNN	1095
A Markovian Function of a Markov Chain ... C. J. BURKE AND M. ROSENBLATT	1112
Asymptotic Distributions of "Psi-Squared" Goodness of Fit Criteria for mth Order Markov Chains ... LEO A. GOODMAN	1123
Efficiency Problems in Polynomial Estimation ... PAUL G. HOEL	1134
On the General Canonical Correlation Distribution ... A. G. CONSTANTINE AND A. T. JAMES	1146
Significance Level and Power ... E. L. LEHMANN	1167
Step-Down Procedure in Multivariate Analysis ... J. ROY	1177
The Limiting Distribution of the Serial Correlation Coefficient in the Explosive Case ... JOHN S. WHITE	1188
A Limit Theorem for the Periodogram ... SALOMON BOCHNER AND TATSUO KAWATA	1198
Proof of Shannon's Transmission Theorem for Finite-State Indecomposable Channels ... DAVID BLACKWELL, LEO BREIMAN, AND A. J. THOMASIAN	1209
On the Limiting Power Function of the Frequency Chi-Square Test ... SUJIT KUMAR MITRA	1221
Some Exact Results for the Finite Dam ... N. U. PRABHU	1234
Minimax Estimation for Linear Regressions ... R. RADNER	1244
Covariances of Least-Squares Estimates When Residuals are Correlated ... M. M. SIDDIQUI	1251

(Continued on outside back cover)

Vol. 29, No. 4 — December, 1958

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $12 per volume (four issues of one calendar year) in the U. S. and Canada, $10 per volume elsewhere. Single issues are $3.50. Back numbers are $12 per volume, $3.50 per issue, $200 for the first 25 volumes, $10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues,** etc., should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning **membership, changes of address,** etc., should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

Editorial Office. Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois, W. H. Kruskal, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Entered as second-class matter at the Post Office at Baltimore, Maryland, under the act of March 3, 1879

COMPOSED AND PRINTED AT THE
